ABOUT THIS REPORT

We are delighted to present TASNEE’s Eighth (8th) Annual Sustainability Report, showcasing our Environmental, Social, and Governance (ESG) and Sustainability performance for 2024. This report highlights our continued commitment to driving sustainable growth, fostering transparency, and embracing global best practices, as we strive to create long-term value for our stakeholders.

The report provides a comprehensive overview of our activities and performance across key ESG areas, including:

- Our environmental stewardship efforts, aimed at minimizing our footprint and promoting eco-friendly practices
- Our social responsibility initiatives, focused on enhancing the well-being of our employees, communities, and customers
- Our governance framework, designed to ensure accountability, transparency, and ethical business practices

By sharing our progress and challenges, we demonstrate our dedication to sustainability, transparency and reaffirm our commitment to making a positive impact on the environment and on our society.

REPORTING PERIOD

The report covers the calendar year from 1 January 2024 to 31 December 2024, unless stated otherwise.

REPORTING GUIDELINES

Developed in accordance with the GRI Sustainability Reporting Standards (refer to [Appendix B](#) for the GRI Content Index), this report is also guided by key national and international sustainability frameworks, including the United Nations Sustainable Development Goals (UN SDGs), Saudi Green Initiative (SGI), and Saudi Vision 2030.

REPORT SCOPE AND BOUNDARY

The report encompasses all TASNEE-operated facilities in Saudi Arabia and covers its three Strategic Business Units (Petrochemicals, Downstream, and Metallurgy), alongside its Business Units. Unless explicitly stated, data related to external contractors, suppliers, and customers are not included.

FEEDBACK

We recognize the importance of stakeholder engagement in shaping our sustainability journey. We welcome feedback, insights, and recommendations to enhance our reporting and performance. Please direct any comments or inquiries to Chief ESG and Sustainability Officer (ESGS@TASNEE.COM).

FORWARD-LOOKING STATEMENTS

This report contains statements that may be deemed as “forward-looking statements” that express the way in which TASNEE intends to conduct its activities. Forward statements could be identified by using forward-looking terminology such as “plans”, “aims”, “assumes”, “continues”, “believes”, or any variations of such words that certain actions, events or results “may”, “could”, “should”, “might”, “will”, or “would” be taken or be achieved.

TASNEE has made every effort to ensure that this report is as accurate and truthful as possible. However, by their nature, forward-looking statements are qualified to inherent risks and uncertainties surrounding future expectations that could cause actual results to differ materially from these projected or implied statements. Such statements are subject to risks that are beyond TASNEE’s ability to control and therefore do not represent a guarantee that events implied in these forward-looking statements will actually occur.

INDEPENDENT ASSURANCE

TASNEE is committed to enhancing the credibility and transparency of our sustainability reporting. To achieve this, we have engaged Bureau Veritas to provide independent limited assurance on selected quantitative indicators disclosed in this report.

The independent assurance process reinforces our dedication to Environmental, Social, and Governance (ESG) and Sustainability principles. By undergoing external assurance, we aim to:

- Enhance confidence in the quality, reliability, and accuracy of our publicly disclosed sustainability data.
- Demonstrate our commitment to transparency and accountability.

For more information on the assurance results, please refer to the [page 91 and 92](#) within this report.

LEADERSHIP PERSPECTIVES: PIONEERING A GREENER TOMORROW

MESSAGE FROM OUR CHAIRMAN

Eng. Mubarak A. Al Khafrah
Chairman

On behalf of the Board of Directors and our valuable partners, I am honoured to present TASNEE's 2024 Annual Sustainability Report.

This report reflects our continued commitment to integrating Environment, Social and Governance (ESG) and Sustainability across all aspects of our business, showcasing the tremendous progress we have made towards a more sustainable and resilient future.

At TASNEE, sustainability is deeply embedded in our corporate culture and business operations. It is not just a strategic priority, but a fundamental aspect of our daily activities. Our newly launched ESG Strategy reinforces this commitment, and we are proud to have made significant strides in our performance, driving progress and excellence in ESG efforts.

By integrating sustainable practices, we drive business growth, enhance operational efficiency, mitigate risks, and contribute to the Kingdom's ambitious objectives under Saudi Vision 2030. Our innovative ESG and Sustainability initiatives align with the global sustainability agenda, reinforcing our corporate goals and commitment to responsible business leadership, and robust governance.

In 2024, we made significant headway in ESG and Sustainability stewardship. Our decarbonization roadmap continues to advance, leading to measurable reductions in greenhouse gas (GHG) emissions across our operations. These strides are bolstered by our commitment to enhancing energy efficiency and minimizing waste, ensuring that we play a proactive role to address the global climate challenges.

Corporate Social Responsibility (CSR) remains central to our mission, as we strive to create lasting positive change in the communities we serve. Through increased investment in local community initiatives, we are fostering economic development, societal progress, and human capital growth reinforcing our alignment with Vision 2030.

As we look to the future, our commitment to ESG and Sustainability remains unwavering. At TASNEE, we are dedicated to setting the standard for responsible business practices by embracing innovative technologies, championing sustainable solutions and driving meaningful change. Our goal is to build a resilient, inclusive, and forward-looking enterprise that benefits our employees, customers, and stakeholders alike. With the establishment of our new dedicated ESG and Sustainability function, I am confident that TASNEE will achieve even greater heights of excellence and make a lasting and positive impact.

I extend my heartfelt thanks to all TASNEE employees, partners, and stakeholders for their continued support and contributions. Our collective efforts make our achievements possible, and I look forward to continuing this journey together as we work toward a prosperous and sustainable future.

I also pray for the continued health and success of our Kingdom's leadership under the Custodian of the Two Holy Mosques, King Salman bin Abdulaziz Al Saud, and His Royal Highness Prince Mohammed bin Salman bin Abdulaziz Al-Saud, Crown Prince and Prime Minister of the Kingdom of Saudi Arabia.

MESSAGE FROM OUR CEO

At TASNEE, we prioritize Environment, Social, and Governance (ESG) and Sustainability, embedding these principles into our core business practices to drive responsible growth, innovation, and excellence.

We strive to find better ways to provide the materials the world needs while driving innovation and continuous improvement. We aim to produce sustainable products, used daily, in the safest and most sustainable ways possible. This commitment extends beyond our products to the communities we serve, as we strive to create a better future for all.

Our team is deeply committed to helping us achieve our sustainability ambitions and positively impact the communities in which we operate.

In 2024, we made significant progress towards reducing our environmental footprint. Notably, our Greenhouse Gas (GHG) emissions intensity **decreased more than 8%** from the previous year across our organization, driven by improved energy efficiency and increased production throughput. This accomplishment is particularly remarkable given the ongoing expansion of our operations. Our commitment to circular economy principles also yielded significant results, with a substantial improvement in material loss intensity. We increased our waste recycling/reuse rate from 16.41

MT per metric ton of production in 2023 to 18.25 MT in 2024, representing an impressive **11% improvement in just one year**. These achievements demonstrate our dedication to minimizing our environmental impact and promoting sustainable growth.

Meanwhile, our digital transformation journey continues to propel us towards excellence in ESG and Sustainability. By harnessing innovative digital technologies - including 3D Printing, Artificial Intelligence, Circular Economy Solutions, and Drone Technology – we are significantly enhancing operational efficiency, strengthening governance, enhancing data-driven decision-making, and minimizing our environmental footprint.

The successful integration of Robotic Process Automation (RPA) and other systems has further optimized processes, driven operational efficiency, and accelerated progress toward our sustainability objectives.

The efforts and performance of our workforce are key to achieving these milestones. In 2024, we achieved a **27% increase in total training hours**, reflecting our commitment to upskilling our employees and preparing them for the challenges ahead. These efforts are aligned with our digitalization initiatives, which enhance both the effectiveness of our workforce and our overall operational agility.

As we continue to make progress on our ESG and Sustainability roadmap, we remain focused on achieving net-zero carbon emissions by 2060. This goal is central to our strategy, and we are actively exploring renewable

energy solutions, including solar installations and energy efficiency projects across our facilities. Our efforts are in line with Saudi Vision 2030, and we are committed to contributing to the Kingdom's economic diversification and sustainability objectives.

Alongside our environmental progress, we remain dedicated to fostering a culture of inclusion and development. This year, our workforce grew more diverse, with a particular focus on increasing opportunities for young talent and women. As we continue to expand and grow, we ensure that our people have the tools and support they need to thrive in a dynamic and sustainable business environment.

I am proud of the progress we have made in 2024, but our journey is far from over. We will continue to lead by example, driving innovation, embracing new technologies, and working towards a sustainable future. I would like to extend my gratitude to all TASNEE employees, partners, and stakeholders for their invaluable contributions to this shared success. Together, we will continue to make meaningful strides towards a better, and more sustainable world.

We offer thanks to Allah the almighty for his blessings and the steadfast leadership of the Custodian of the Two Holy Mosques, King Salman bin Abdulaziz Al Saud, and His Royal Highness Prince Mohammed bin Salman bin Abdulaziz Al-Saud, Crown Prince and Prime Minister of the Kingdom of Saudi Arabia. May Allah grant them continued success and health.

Mr. Fawaz M. Al Fawaz
Chief Executive Officer

PROGRESS IN ACTION

2024 PERFORMANCE HIGHLIGHTS

ENVIRONMENTAL STEWARDSHIP

8.38% 

reduction in overall GHG emissions intensity compared to 2023

13.79 
GJ/MT

energy intensity achieved, showing 3.96% efficiency improvements with respect to 2022.

18.25% 

of total waste generated was recycled, marking an 11% increase from 2023

3% 

increase in total water recycling, reinforcing sustainable water management

HEALTH & SAFETY

Zero 

work-related fatalities for the third consecutive year

87% 

reduction in Total Recordable Injury Frequency Rate (TRIFR) for employees from 2.76 in 2023 to 0.35 in 2024

1,301 

health screenings conducted in 2024, a 6% increase from 2023

59 

emergency response drills conducted, a 34% increase from 2023

4,477 

hours of health and safety training delivered to employees and contractors

HUMAN CAPITAL & TALENT DEVELOPMENT

132,648 

total training hours delivered,
a 27% increase from 2023

42 

average training hours per employee,
up from 35 in 2023

63% 

increase in female employees, with 13 women
now in middle management roles

88% 

of employees received performance
and career development reviews

RESPONSIBLE BUSINESS & ETHICAL GROWTH

100% 

of operations assessed for corruption-related risks,
with zero incidents reported

12 

internal audits completed, ensuring robust risk
management and compliance

78% 

of total procurement spending directed to
local suppliers, supporting Saudi Vision 2030

55% 

of procurement requests automated through
digital transformation initiatives

85% 

of employees trained on anti-corruption practices,
reinforcing ethical business conduct

Zero 

TASNEE recorded zero incidents of
non-compliance with our Code of Conduct
and Business Ethics for the third consecutive
year

COMMUNITY IMPACT

SAR 5.3M 

invested in community initiatives,
more than doubling 2023 contributions

13,000+ 

beneficiaries reached through
15 CSR programs

447 

volunteer hours contributed by
105 employee volunteers

Two 

Gold Awards in CSR, including
Best in the Business Services Sector

trees planted as part of the Saudi Green Initiative
and Green TASNEE initiative

WHO WE ARE & WHAT WE DO

TASNEE AT A GLANCE

Since inception in 1985, the National Industrialization Company (TASNEE) has played a crucial role in Saudi Arabia’s industrial development, becoming the country’s first fully owned joint-stock private-sector industrial company.

Headquarters in Riyadh, TASNEE was founded to drive economic diversification, fostering innovation and technological advancement within the Kingdom’s industrial and petrochemical sectors.

Almost 40 years since inception, TASNEE, together with its entities and subsidiaries, has evolved into one of Saudi Arabia’s largest and most influential industrial and petrochemical companies, with a significant global footprint in the Metallurgy sector (Titanium). Our reputation is built on a commitment to operational efficiency, advanced manufacturing, and sustainable innovation, enabling us to deliver high-performance products and services while continuously adopting cutting-edge technologies to meet evolving industry demands.

TASNEE operates across multiple strategic sectors, including, petrochemicals, chemicals, downstream products, advanced metals to industrial services. The company is deeply involved in the development, management, and marketing of industrial projects, ensuring the integration of advanced industrial technology into Saudi Arabia’s economy. Through its subsidiaries, TASNEE produces and distributes an extensive range of petrochemical products, such as ethylene, polyethylene, propylene, polypropylene, butyl acrylate, acrylic

acid, super absorbent polymers, and butanol, alongside industrial materials, including ilmenite slag, titanium sponge, lead-acid car batteries, lead, high-performance plastic products, and acrylic sheets. Beyond production, TASNEE actively engages in technical services, equipment testing, and the operation of key industrial and energy facilities, including chemical, petrochemical, metallurgical, water desalination, and power generation plants.

TASNEE’s vision and mission serve as the foundation of our operations, shaping our approach to responsible business practices and long-term sustainability. Through robust policies, standard operating procedures (SOPs), strong governance, and strategic initiatives, we translate our commitment into actions. We uphold the highest standards of quality, health, safety, and security, minimizing our environmental impacts, and fostering strong principles of ESG and Sustainability across our value chain. By embedding these principles into every aspect of our business, we create lasting value for our stakeholders and communities, reinforcing our role as a responsible and forward-thinking industry leader.

OUR IMPACT IN NUMBERS:

3,223

Employees

OUR PURPOSE & CORE VALUES

VISION

To optimize stakeholders' returns and contribute to industrialization by pursuing ambitious opportunities.

MISSION

To consistently operate at high standards of agility, efficiency, sustainability, and innovation in the petrochemicals industry.

OUR VALUES

EXCELLENCE:

We believe that good is not good enough; we strive to do more with agility and speed. We show excellence in our processes.

INTEGRITY:

We do what is right as a role model to others and treat people with respect, never bending the rules.

SEEKING KNOWLEDGE:

We actively interact with our stakeholders. We are open to continuous learning and creative thinking.

TEAMWORK:

We respect individual skills and backgrounds, and we believe that we are smarter together.

OUR BUSINESS MODEL & VALUE CREATION

TASNEE's diversified operations are strategically organized into 3 Strategic Business Units (SBU's) and 4 Business Units (BU's), each designed to optimize performance and drive growth.

At the core of our organizational structure are three Strategic Business Units (SBUs), focused on:

Petrochemical: Leveraging our expertise in petrochemical production to deliver high-quality products and solutions.

Metallurgy: Utilizing our metallurgical expertise to produce advanced materials and products.

Downstream: Driving innovation and growth in the downstream sector through our specialized products and services.

These SBUs are complemented by four Corporate Functions (BU's), which provide additional capabilities and support for our core operations.

Our strategic configuration enables us to:

- Focus on targeted growth opportunities and expansion
- Enhance operational efficiency and reduce costs
- Drive business excellence and innovation across all divisions

These specialized functions are instrumental in reinforcing our commitment to responsible business practices, continuous improvement, and long-term growth, ultimately ensuring that TASNEE remains a leader in its industries.

OUR ORGANIZATIONAL STRUCTURE

OUR STRATEGIC BUSINESS UNIT LEGAL ENTITY SETUP

% TASNEE ownership.

- Highlighted companies are equity accounted investments.
- Certain other investments directly owned by TASNEE are depicted under Downstream SBU.

OUR PRODUCTS

INNOVATION FOR A SUSTAINABLE FUTURE

TASNEE is a leading manufacturer of a diverse range of cutting-edge products across three key sectors: Petrochemicals, Downstream, and Metallurgy. Our state-of-the-art products are designed to meet the evolving needs of our customers, leveraging the latest advancements in technology and innovation.

Our product portfolio is built on a foundation of quality, reliability, and performance. We utilize the latest manufacturing techniques, advanced materials, and rigorous testing protocols to ensure that our products meet the highest standards of excellence.

By investing in research and development, we stay at the forefront of industry trends and technological advancements. This enables us to develop innovative solutions that address the complex challenges faced by our customers, while also reducing our environmental footprint.

1. PETROCHEMICALS SBU

The Petrochemicals Strategic Business Unit (SBU) is TASNEE's largest business unit, playing a vital role in the production and global marketing of a diverse portfolio of polyolefins and chemicals. Our petrochemical products serve as essential building blocks for various industries worldwide, including packaging, automotive, construction, and consumer goods.

OUR PRODUCTS

- Polypropylene (PP)
- High-density Polyethylene (HDPE)
- Low-density Polyethylene (LDPE)
- Butyl acrylate (BA)
- Glycolic acrylic acid (GAA)
- Butanol (n-Butanol/ and Iso-Butanol)
- Super absorbent Polymer (SAP)

2. METALLURGY SBU

The Metallurgy SBU oversees the production and marketing of metallurgy products and services, with a strong focus on developing the titanium value chain in Saudi Arabia, in-line with Saudi Vision 2030.

OUR PRODUCTS

- Titanium Slag (Chloride, Sulphate fines)
- Titanium Sponge (A, B, Powder)
- Pig Iron (Nodular, Basic, Ground Cast)

3. DOWNSTREAM SBU

TASNEE's Downstream SBU plays a vital role in supporting local industries, reducing dependency on imports, and driving economic growth through a network of affiliates and specialized manufacturing units.

OUR PRODUCTS

- Agri films
- Biaxially Oriented Polypropylene (BOPP) films
- Plastic products
 - Pipes
 - Pallets
 - Crates
 - Sheets
 - Pails
 - Battery containers
 - Core plugs
 - Reprocessed Resins
- Geomembranes
- Lead and Lead Alloys
- Automotive batteries
- Sodium Sulphate
- Inspection, training & certification services

4. TECHNOLOGY AND INNOVATION (BU)

Our Technology and Innovation (T&I) Center serves as the company's research and development hub, driving innovation, technical excellence, and sustainability across all business units. Through cutting-edge research and development as well as product stewardship initiatives, T&I ensures that our petrochemical products meet the highest safety and environmental standards. The Center also reinforces our commitment to responsible manufacturing and obligatory compliances.

RECOGNITIONS & ACHIEVEMENTS

TASNEE’s commitment to excellence, innovation, and sustainability has been consistently recognized by prestigious organizations and industry peers. These recognitions and achievements demonstrate TASNEE’s dedication to setting new standards in the industries we serve, while maintaining a strong focus on sustainability, social responsibility, and community engagement. Some of our notable achievements include

PETROCHEMICALS SBU

- ISO 9001:2015 (Quality Management)
- ISO 14001:2015 (Environmental Management)
- RC 14001: 2023 (Responsible Care Management)
- ISO 45001:2018 (Occupational Health and Safety Management)
- ISO/IEC Standard 17025:2017 (General requirements for the competence of testing and calibration laboratories)
- ISO 50001:2018 (Energy Management)
- ISO 55001:2014 (Asset Management)
- Polymer products are registered under Registration, Evaluation, Authorisation and restriction of chemicals (REACH) regulations
- Polymer products are pre-registered for Turkish KKDIK (Kayit (Registration), Değerlendirme (Evaluation), İzni (Authorization), and Kısıtlanması (Restriction) of Kimyasalların (Chemicals) certification
- Polymer products are pre-registered for Bureau of Indian Standards (BIS) certification

CERTIFICATION/REGISTRATION	MARKET CONCERNED	MANUFACTURING ENTITY	REMARKS
REACH	European market	SPC	Polymers are exempted for REACH registration; however, monomer needs to be registered. Propylene is registered for SPC.
		SEPC	Polymers are exempted for REACH registration; however, monomer needs to be registered. Ethylene is registered for SEPC.
		SAMCO	Butyl acrylate is registered
KKDIK	Turkey Market	SPC	All substances pre-registered.
		SEPC	All substances pre-registered.
		SAMCO	All substances pre-registered.
		SAPCO	All substances pre-registered.
BIS	Indian Market	SEPC	BIS License granted for Polyethylene materials produced in SEPC.
		SAMCO	BIS License granted for butyl acrylate produced in SAMCO.
		SPC	BIS license applied for polypropylene materials. Site audit conducted. Process ongoing.
		Branch of SPC	BIS license applied for PE compounds. Site audit conducted. Process ongoing.
		Branch of SPC	BIS license applied for PP compounds. Audit conducted. Process ongoing.

- The Gulf Petrochemicals and Chemicals Association - Sustainability & Quality Assessment System (GPCA-SQAS)
- The Jubail Area Mutual Aid Association (JAMAA)

2024 AWARDS:

SUSTAINABILITY AND ENVIRONMENTAL AWARDS

- Sustainable Manufacturing Award at the Saudi Arabia Cleaning, Waste Management, and Facilities Management (SACWFM) Awards.
- Forbes Middle East Sustainability Leaders 2024 – recognized for leadership in sustainability.
- International Energy Management Insight Award – awarded to TASNEE PetChem for consistent compliance with ISO 50001.
- Golden Awards in Corporate Social Responsibility 2024 – recognized for excellence in CSR initiatives.

PROCUREMENT AND SUPPLY CHAIN AWARDS

- Innovation in Supply Chains Award – Gulf Petrochemicals and Chemicals Association (GPCA) for the Digital Transformation Project.
- Best Use of Digital Technology Award – Chartered Institute of Procurement & Supply (CIPS) for leveraging digital technology in procurement.
- Outstanding Talent Development Program Award – CIPS for the ENJAZ project, which focuses on knowledge management and talent development.
- Excellence in Procurement Award – International Procurement and Supply Chain Awards (IPSC) 2024 (Blue Ocean) for outstanding procurement practices.
- Three High-Level Awards – recognized in the field of supply chain and procurement excellence.
- Local Content Certification – awarded by the Local Content & Government Procurement Authority.

CORPORATE GOVERNANCE AND OPERATIONAL EXCELLENCE

- General Conformance Classification – TASNEE's Internal Audit Department achieved the highest level of conformance by the Saudi Institute of Internal Auditors.
- SAP Center of Expertise Certification – Recognizing TASNEE's digital transformation efforts.
- SAP Signavio Process Transformation Innovation Award – Acknowledging excellence in process transformation.

INDUSTRY PARTICIPATION AND RECOGNITION

- Participation Award – Recognized as a key speaker in the (Saudi Industrial Development Fund) SIDF Lean Manufacturing Program.

A ROADMAP FOR IMPACT

ESG AND SUSTAINABILITY GOVERNANCE & STRATEGY

At TASNEE, ESG principles and sustainability practices are deeply ingrained in our corporate DNA. Our long-term business strategy and day-to-day decision-making processes are informed by a strong commitment to responsible and sustainable practices.

OUR APPROACH:

- Founded on actionable policies that ensure compliance with international standards and local regulations
- Focus on enhancing quality, health, safety, and security (QHSS) within our operational framework
- Strategic commitments supported by detailed governance structures, including dedicated ESG and Sustainability Function.

OUR COMMITMENT:

- Creating long-term value while ensuring a measurable, positive impact on the planet, our stakeholders, and the communities we serve
- Advancing a sustainable, resilient, and regenerative future through targeted innovation, rigorous policy enforcement, and a culture of continuous improvement

By integrating ESG and Sustainability into every level of our operations, we aim to make a lasting, positive difference in the world around us.

GOVERNANCE AND OVERSIGHT

ENSURING EFFECTIVE ESG AND SUSTAINABILITY MANAGEMENT

The Board’s commitment to sustainability plays a vital role in overseeing the development, implementation, and progress of our ESG and Sustainability Framework and Policy. The CEO provides strategic guidance on ESG initiatives, focusing on key areas and reporting directly to the Board Sub Committee.

TASNEE’s ESG and Sustainability performance is measured against established ESG and Sustainability Key Performance Indicators (KPIs) and objectives. This ensures that our ESG and Sustainability efforts remain on track and aligned with our overall business strategy.

At the heart of our ESG and Sustainability efforts is the ESG and Sustainability Function, which serves as the central hub for promoting ESG excellence and sustainability practices across the organization. This function drives a culture of sustainability, providing guidance, support, and expertise to ensure that ESG considerations are integrated into every aspect of our business.

ESG AND SUSTAINABILITY FUNCTION IS TASKED WITH SEVERAL CRITICAL ROLES

STRATEGY AND GOVERNANCE

- Developing and setting the overarching ESG and Sustainability strategy, aligned with TASNEE’s business objectives.
- Crafting and enforcing policies, procedures, and standards dedicated to ESG and Sustainability.
- Ensuring compliance with regulatory requirements and industry standards.

PERFORMANCE MONITORING AND REPORTING

- Monitoring and evaluating the ESG and Sustainability performance of SBUs.
- Collecting and analyzing data to identify opportunities for improvement.
- Preparing and publishing comprehensive ESG and Sustainability reports.

STAKEHOLDER ENGAGEMENT

- Engaging both internal and external stakeholders on ESG and Sustainability issues.
- Building partnerships with key stakeholders to advance ESG and Sustainability goals.
- Promoting transparency and accountability in ESG and Sustainability performance.

Overall, TASNEE’s ESG and Sustainability function ensures a cohesive and accountable approach to ESG and Sustainability, fostering continuous improvement and responsible business practices across the organization.

EMBARKING ON A SUSTAINABLE FUTURE

TASNEE'S ESG STRATEGY 2025-2030

In 2024, TASNEE took a significant step towards a more sustainable future by approving its ESG Strategy 2025-2030. This comprehensive framework serves as a guiding force behind our long-term vision, empowering us to make informed, sustainable decisions that drive growth while minimizing our environmental footprint.

To achieve our ambitious goals, we are cultivating a culture of innovation, agility, and courage. We recognize that challenging conventional practices and embracing new ideas is crucial to unlocking sustainable solutions. Collaboration with our stakeholders is vital to our success, as we work together to foster a more sustainable and circular economy across our entire value chain – from production to purchasing to consumption.

Through our ESG Strategy, we are committed to creating a better future for all our stakeholders, while ensuring the long-term sustainability and resilience of our business.

OUR ESG STRATEGIC APPROACH: DRIVING SUSTAINABILITY AND LONG-TERM SUCCESS

Our ESG approach is structured to effectively manage and improve our environmental, social, and governance impacts, aiming to:

- Assess and enhance our ESG impact and build resilience and long-term success
- Meet the evolving needs and expectations of our stakeholders
- Drive positive change and contribute to a more sustainable future
- Evaluate and improve our performance on key ESG indicators
- Identify and mitigate potential risks

DRIVING ESG EXCELLENCE: RESPONSIVENESS TO A CHANGING GLOBAL LANDSCAPE

Our ESG Strategy is designed to be agile and responsive to the evolving global landscape. Recognizing the Kingdom of Saudi Arabia’s existing regulatory framework covering environmental, social, and governance aspects, we remain vigilant and proactive in anticipating further regulatory developments that may impact our operations.

By staying ahead of regulatory risks and capitalizing on opportunities emerging from the energy transition, we demonstrate our unwavering commitment to responsible and sustainable business practices. This forward-thinking approach not only drives long-term success but also fosters a more resilient, sustainable, and adaptable TASNEE.

KEY DRIVERS FOR OUR ESG ADOPTION INCLUDE:

- Anticipating and responding to regulatory developments and trends
- Proactively managing risks and capitalizing on opportunities
- Demonstrating our commitment to responsible and sustainable business practices
- Ensuring long-term success and resilience through ESG excellence.

STRATEGIC PRINCIPLES AND PRIORITIES TO 2030: GUIDING OUR JOURNEY TO ESG AND SUSTAINABILITY EXCELLENCE

As we embark on our journey to 2030, our ESG Strategy is guided by a set of strategic principles and priorities that will shape our decisions, actions, and outcomes. These principles and priorities are designed to ensure our long-term sustainability, resilience, and success, while creating value for our stakeholders and contributing to a better future for all. By living these strategic principles and priorities, we will create a brighter, more sustainable future for ourselves, our stakeholders, and the communities we serve

For a comprehensive overview of our ESG Strategy roadmap and initiatives, please refer to Appendix-C on page 89 for more details.

ENVIRONMENT

We are relentlessly working towards achieving net zero carbon emissions by 2060.

Our investments prioritize environmental and product stewardship, promoting sustainable practices that protect and preserve natural resources for future generations.

Our focus is to achieve decarbonization, eliminating flaring, minimizing waste, maximizing recycling, and harnessing renewable energy.

SOCIAL

Equality, Diversity, and Inclusion are central to our work.

Health, safety and wellbeing are core for our work environment.

We develop talent and skills to provide a world-class workforce.

We share our knowledge, skills and resources to benefit our communities.

We engage with local communities and support social initiatives that drive positive impact.

GOVERNANCE

Integrity, strengthening accountability and transparency are critical in our leadership.

Our leadership reflects society and embraces diversity in its many forms.

We are dedicated to achieve excellence in corporate governance, risk management, and opportunity management, ensuring that our board, leadership, and management practices are best in class and forward-thinking.

We embed responsible business practices throughout our operations and supply chain.

OUR FIVE PRIORITY PILLARS

Following a comprehensive materiality assessment, TASNEE identified five key pillars and strategic priority areas that align with 12 out of the 17 United Nations Sustainable Development Goals (UN SDGs) and the relevant objectives of Saudi Vision 2030. The five key pillars are:

ENVIRONMENTAL STEWARDSHIP

Protecting the planet
for future generations

HEALTH AND SAFETY

Ensuring the well-being of our
people and communities

HUMAN CAPITAL DEVELOPMENT

Empowering our workforce
for a sustainable future

COMMUNITY IMPACT

Making a positive difference
in the lives of those
around us

RESPONSIBLE BUSINESS

Operating with integrity,
transparency, accountability
and strong governance

These pillars guide our strategic priorities and drive our commitment to sustainability, ensuring we make a meaningful impact and contribute to a more sustainable future.

ALIGNING OUR ESG INITIATIVES WITH THE UN SUSTAINABLE DEVELOPMENT GOALS (SDGs) AND SAUDI VISION 2030

At TASNEE, we recognize the importance of contributing to a more sustainable and equitable future. To maximize our impact, we have strategically aligned our ESG initiatives with 12 of the United Nations' Sustainable Development Goals (SDGs).

These 12 SDGs were carefully selected through a comprehensive materiality assessment, as outlined in this report. By focusing on these specific goals, we aim to make a meaningful difference in the lives of our stakeholders and contribute significantly to local, regional, and global progress.

Our SDG-aligned initiatives shape our sustainability roadmap, guiding our efforts to:

Address pressing global challenges

Drive sustainable growth, innovation, and economic development

Foster collaboration, partnerships, and collective action among stakeholders

By integrating the UN SDGs into our ESG strategy, we demonstrate our commitment to creating a more sustainable, resilient, and equitable future for all.

COMMUNITY IMPACT

MATERIAL ISSUES

- Volunteering and Charities
- Benefits to Local Communities
- Community Engagement

SAUDI NATIONAL VISION 2030

- A Vibrant Society
- A Thriving Economy

RESPONSIBLE BUSINESS

MATERIAL ISSUES

- Economic and Business Performance
- Legal Compliance
- Business Ethics
- Human Rights
- Customer Feedback and Satisfaction
- Innovation
- Procurement and Supplier Assessment

SAUDI NATIONAL VISION 2030

- An Ambitious Nation
- A Thriving Economy

ENVIRONMENTAL STEWARDSHIP

MATERIAL ISSUES

- Climate Change
- Greenhouse Gas Emissions
- Energy Management
- Effluents and Pollutants
- Hazardous Substances
- Water Use
- Product Stewardship

SAUDI NATIONAL VISION 2030

- A Thriving Economy
- A Vibrant Society

HEALTH AND SAFETY

MATERIAL ISSUES

- Occupational Health and Safety

SAUDI NATIONAL VISION 2030

- A Vibrant Society
- A Thriving Economy

HUMAN CAPITAL DEVELOPMENT

MATERIAL ISSUES

- Development and Training
- Recruitment and Retention
- Engagement and Satisfaction
- Diversity
- Inclusion and Equality

SAUDI NATIONAL VISION 2030

- A Thriving Economy
- A Vibrant Society

ALIGNMENT WITH SAUDI VISION 2030

Saudi Vision 2030 is a transformative national strategy designed to drive economic diversification, enhance sustainability, and create new opportunities for growth and innovation. Leveraging Saudi Arabia’s strategic geographical position and its greatest asset, its people, the vision positions the Kingdom as a global economic hub connecting Africa, Asia, and Europe.

The vision is structured around three fundamental pillars that guide national progress:

A VIBRANT SOCIETY

Building a strong social foundation by improving quality of life, fostering cultural and recreational development, and ensuring well-being for all.

A THRIVING ECONOMY

Expanding economic opportunities for individuals and businesses, fostering innovation, and equipping future generations with the skills needed for a competitive job market.

AN AMBITIOUS NATION

Strengthening governance, promoting transparency, and enhancing institutional effectiveness to drive long-term national success.

Our sustainability strategy is deeply aligned with Vision 2030, ensuring that our efforts contribute meaningfully to the Kingdom’s goals, as follows:

- ☒ **Empowering a vibrant society** – We invest in initiatives that support education, healthcare, community development, and social well-being, helping create a healthier and more inclusive society.
- ☒ **A thriving economy stewardship** – Through industrial innovation, job creation, and human capital development, we support Saudi Arabia’s transition to a knowledge-based and diversified economy.
- ☒ **Upholding an ambitious nation** – We have embedded strong corporate governance, ethical business practices, and sustainability principles into our operations, reinforcing transparency and accountability at all levels.

STAKEHOLDER ENGAGEMENT

Operating as a sustainable business means actively addressing the risks, opportunities, and issues that matter most to our stakeholders.

To achieve this, we maintain open, honest, and transparent dialogue with key groups of stakeholders, making sure their perspectives are considered in our decision-making processes. In line with the AA1000 Stakeholder Engagement Standard, we follow a structured approach to stakeholder engagement, allowing us to identify priorities, address concerns, and strengthen our long-term ESG-Sustainability strategy.

We have identified all key stakeholder groups with whom we regularly engage to gather insights, foster collaboration, and drive meaningful progress in our sustainability efforts. These groups are:

LOCAL COMMUNITIES

- Sustainability & annual reports
- Sponsorship events
- Website & social media
- Community investment

EMPLOYEES

- Intranet
- Sustainability & annual reports
- Website and social media
- Employee surveys & recognition programs
- Townhalls & health and safety campaigns
- Internal newsletter

BUSINESS PARTNERS

- Sustainability & annual reports
- Website & social media

SHAREHOLDERS

- Sustainability & annual reports
- Annual, semi-annual & monthly reports
- Website and social media

SUPPLIERS & CONTRACTORS

- Sustainability & annual reports
- Website & social media
- Supplier management system
- Townhalls & health and safety campaigns
- Maintaining fair & competitive selection

LOCAL AUTHORITIES

- Sustainability & annual reports
- Website & social media
- Complying with obligations

CUSTOMERS

- Sustainability & annual reports
- Market research
- Website and social media
- Customer satisfaction survey

MATERIALITY

OUR PRIORITIES FOR SUSTAINABLE GROWTH

Materiality involves the identification of important issues that pertain to our organization. This approach aims to pinpoint key economic, environmental, and social concerns that can either notably affect TASNEE’s operational success or substantially influence the opinions and choices of its stakeholders.

Effective stakeholder engagement is fundamental to achieving our sustainability goals, as it allows us to identify key risks and opportunities, strengthen business resilience, and align our efforts with stakeholder expectations. Our materiality assessment, conducted in accordance with Global Reporting Initiative (GRI) standards, follows a structured three-step process to determine the most relevant issues for both TASNEE and stakeholders while assessing their potential business impact.

1. Identification – We conducted desk-based research, analyzed industry standards, reviewed the best practices of peer companies, and held employee interviews to gather relevant sustainability issues.

2. Prioritization – We collaborated with our internal and external stakeholders.

3. Review – The ESG-Sustainability team evaluated the results, refined the findings, and ensured a balanced stakeholder perspective before submitting the final list of priorities for management approval.

By prioritizing and addressing the material concerns and interests of our stakeholders, we not only ensure the relevance of our ESG strategy but also demonstrate our commitment to transparency, accountability, and meaningful dialogue, ultimately driving positive change and contributing to our long-term ESG- Sustainability objectives. This process resulted in the identification of 48 material issues, mapped based on stakeholder significance and operational impact; also the same were aligned with our sustainability framework in-line with the UN SDGs.

However, we focus on 23 material topics for this reporting Year 2024, whereas 14 most critical issues and 9 additional key priorities have been discussed in detail under this report. Those topics have been visually mapped into our materiality matrix to highlight their importance and relevance.

FIVE PRIORITY PILLARS

- Environmental Stewardship
- Health and Safety
- Human Capital Development
- Responsible Business
- Community Impact

For this report, TASNEE has covered the material topics as presented and highlighted in a bullet point for each key priority pillars with different color codes.

ENVIRONMENTAL STEWARDSHIP

RESPONSIBLE OPERATIONS FOR A BETTER PLANET

At TASNEE, we are committed to minimizing our environmental footprint by proactively assessing and managing the impact of our operational activities on ecosystems and communities. We ensure our operations are aligned with the highest environmental standards through strict accountability measures, sustainable practices, and continuous improvement.

MATERIAL ISSUES

-  Climate Change (Policy & Strategy)
-  Greenhouse Gas Emissions
-  Energy Management
-  Effluents and Waste Management
-  Hazardous Substances
-  Water Use (Water Stress)
-  Product Stewardship
-  Materials and Responsible Sourcing

ALIGNMENT WITH SAUDI VISION 2030:

-  A Thriving Economy
-  A Vibrant Society

ALIGNMENT WITH UN SDGs:

TACKLING CLIMATE CHANGE

OUR CARBON FOOTPRINT

Climate change is a persistent global challenge, and we recognize the critical need for proactive action. As a responsible business, we embed climate-conscious strategies into our decision-making so that we can meet the evolving needs of our stakeholders, communities, and the planet.

Our commitment to environmental stewardship is reflected in our comprehensive environmental strategy, guided by strong policies and procedures across all TASNEE affiliates. We prioritize pollution prevention by applying the Best Available Techniques (BAT) but not entailing excessive cost approach to elimination, substitution, engineering control and administrative control as per its hierarchy while issuing new construction & operating permits by local authority and continuously monitoring and mitigating environmental risks.

PetChem has considered nature related topics in the materiality assessment where these topics and/or all environmental aspects are covered in our Environmental Permit to Operates (EPO) such as Air Emissions, Water Pollutants, Hazardous Material Management, Noise, Waste, Groundwater Monitoring, Soil & Ambient Air Quality.

Through strict compliance, innovation, and sustainability-driven initiatives, we are actively working to:

Reduce emissions and minimize our carbon footprint

Enhance resource efficiency and optimize our operations

Contribute to a low-carbon future such as Renewable Energy and support the transition to a more sustainable economy

PROGRESS & PLANS

GHG EMISSIONS REDUCTION

We are actively reducing emissions across our operations by optimizing performance, enhancing energy efficiency, and implementing clean and renewable energy solutions.

Our decarbonization roadmap, aligned with Saudi Vision 2030 and the Saudi Green Initiative (SGI), outlines a strategic pathway to achieving net-zero carbon emissions by 2060 across our Strategic Business Units (SBUs), utilizing the latest technologies and sustainable energy solutions.

As part of our strategy, we conducted a baseline emissions audit, revealing that 71% of our total annual emissions are from direct (Scope 1) sources, which include fuel gas consumption, fuel oil consumption (if any), company-owned vehicles, process emissions such as flaring, fugitive emissions, and point source emissions. The remaining 29% are indirect emissions (Scope 2) from purchased energy. To address this, we are advancing a hybrid approach that prioritizes future adoption of hydrogen refueling, post-combustion carbon capture, and continuous improvement in plant reliability. Additionally, we are proceeding with the solar power systems at T&I site to cover 25% of energy requirement, while other site offices' power needs evaluation is ongoing, with a targeted total reduction of 4,747 MT CO₂e emissions.

TASNEE has developed a comprehensive decarbonization roadmap, quantifying Scope 1 and Scope 2 carbon emissions across all TASNEE operations for each activity, product, and

service. This initiative, led jointly by TASNEE Petrochemical SBU and the T&I teams, enables precise tracking of carbon emissions at every stage of operations.

Moving forward, T&I will focus on exploring innovative and emerging decarbonization technologies, while Petrochemical SBU will implement decarbonization initiatives through Management of Change (MOC), a systematic approach to managing organizational change, and projects to achieve roadmap targets and reduce emissions. As part of this commitment, TASNEE is implementing various initiatives aimed at reducing 117,000 MT CO₂e emissions within the petrochemical sector by 2030.

We have adopted a phased decarbonization strategy (2025–2060), allowing for financial flexibility while adapting to evolving policies, technological advancements, and market dynamics. A key planned initiative focuses on phasing out the use of heavier liquid fuels, replacing them with methane to enhance efficiency and lower emissions. We also actively collaborate with external partners and licensors to integrate cutting-edge decarbonization technologies, ensuring alignment with global sustainability standards.

We commenced our decarbonization journey in 2024.

This strategy encapsulates multiple stages of our decarbonization process, beginning with the completion of a carbon baseline assessment, which is currently undergoing validation and assurance. Our strategy also defines our vision for a decarbonized future state and includes comprehensive scenario planning as part of our ongoing strategic development. We are in the process of finalizing a roadmap and implementation plan, with specific focus on developing carbon capture initiatives pending approval. Our efforts to operationalize decarbonization are actively progressing, demonstrating our commitment to a sustainable future.

Our sustained focus on energy efficiency has already led to achieve more than 8% reduction in CO₂e emission intensity in 2024 comparing with previous year. It is a trend expected to continue as we expand renewable energy solutions and enhance operational efficiency. We also closely monitor our product carbon footprint to ensure compliance with sustainability targets across the Gulf Cooperation Council (GCC) and Asia. By quantifying company-wide CO₂e emissions, we can prioritize high-impact decarbonization efforts, particularly within Petrochemical SBU operations.

In 2024, TASNEE further solidified its commitment to sustainability through the launch of Green TASNEE initiatives, including solar photovoltaic (PV) installations and promoting social reach-out programs and green environment by planting 1,800 trees in 2024. Looking ahead, we are actively evaluating the expansion of renewable energy deployment across other business units.

CASE STUDY:

TREE PLANTING FOR A SUSTAINABLE FUTURE

TASNEE launched a tree plantation initiative to enhance biodiversity and improve quality of life as part of our commitment to a greener future. A total of 1,800 trees were planted at TASNEE. It is an initiative which aligns with TASNEE's broader decarbonization strategy, and the company plans to expand tree planting efforts across its other facilities, reinforcing our commitment to climate action and ecosystem restoration.

1,800 

trees were planted as part of the Saudi Green Initiative and Green TASNEE initiative

2024 EMISSION REDUCTION

Our emissions reduction efforts continued to deliver notable successes in 2024; both Petrochemical SBU and Downstream SBU achieved reductions in emissions intensity for reporting Year 2024. PetChem’s GHG emissions intensity dropped from 0.877 CO₂e emissions in MT per MT of production in 2023 to 0.795 in 2024, which shows a substantive 9.27% reduction. Downstream SBU recorded a slight decline in intensity, falling from 1.195 to 1.150 CO₂e emission in MT per MT of production for the same reporting period.

Overall, TASNEE’s GHG emissions intensity showcase a substantial reduction for 8.38% improvement from 0.907 CO₂e emission in MT per MT of production in 2023 to 0.831 in 2024.

GHG EMISSIONS	SBU	UNITS	2022	2023	2024
Direct (Scope 1) GHG emissions	PetChem	MT CO ₂ e	2,649,828	2,660,245	2,575,119
	Downstream	MT CO ₂ e	69,141	72,226	71,306
	AMIC	MT CO ₂ e	2,156	1,416	1,904
	TASNEE	MT CO ₂ e	2,721,125	2,733,886	2,648,329
Indirect (Scope 2) GHG emissions	PetChem	MT CO ₂ e	1,077,366	1,098,948	800,611
	Downstream	MT CO ₂ e	124,357	134,726	137,682
	AMIC	MT CO ₂ e	98,020	122,424	133,441
	TASNEE	MT CO ₂ e	1,299,743	1,356,098	1,071,734
Total GHG emissions	PetChem	MT CO ₂ e	3,727,194	3,759,192	3,375,730
	Downstream	MT CO ₂ e	193,498	206,952	208,988
	AMIC	MT CO ₂ e	100,176	123,840	135,345
	TASNEE	MT CO ₂ e	4,020,868	4,089,984	3,720,063
GHG emissions intensity	PetChem	MT CO ₂ e emissions / MT of production	0.913	0.877	0.795
	Downstream	MT CO ₂ e emissions / MT of production	1.276	1.195	1.150
	AMIC	MT CO ₂ e emissions / MT of production	3.745	2.514	2.590
	TASNEE	MT CO ₂ e emissions / MT of production	0.943	0.907	0.831

CASE STUDY:

PHASING OUT HEAVY LIQUID FUELS FOR LOWER CARBON EMISSIONS

As part of its decarbonization strategy, TASNEE initiated a phased approach to eliminate all heavy liquid fuels and replace them with lower-carbon energy sources such as natural gas. By systematically identifying and replacing liquid fuel firings, the company will be transitioned to fuel gas, resulting in an estimated emission reduction of 63,400 MT CO₂e per year. This initiative not only contributes to lower emissions but also enhances operational efficiency and aligns with TASNEE’s long-term sustainability roadmap, reinforcing our commitment to net-zero emissions by 2060 and establishing ourselves as a leader in industrial decarbonization.

AIR EMISSIONS

CLEANER OPERATIONS

Air emissions play a critical role in both climate change and public health.

To ensure compliance and environmental stewardship, we maintain continuous monitoring and vigilance of our emissions control through dedicated practices (e.g. point source emission monitoring and control, continuous emission monitoring and control, area source monitoring

and control by using US EPA method 21 as applicable) to ensure they remain within obligatory limits set by the local regulatory authority and the conditions outlined in our environmental permits.

We are committed to enhancing emissions efficiency through a comprehensive Air Emission Management System, which includes several strategic initiatives to reduce environmental impact:

EXPANDED GHG MONITORING

GHG emissions, including CO₂, CH₄, and volatile organic compounds (VOCs), are now incorporated into our annual stack testing program in alignment with the Saudi Green Initiative.

FUGITIVE EMISSIONS REPORTING

Our detailed Fugitive Emission Report provides insight into material loss statistics, highlighting opportunities for cost savings, improved sustainability performance, enhanced regulatory compliance, and stronger health and safety measures.

AMBIENT AIR QUALITY MONITORING (AQMS)

We do measure the quantity and types of certain pollutants in the surrounding, outdoor air through ambient air quality monitoring system which is a systematic, long-term assessment of pollutant levels measurement.

ANNUAL RELATIVE ACCURACY TEST AUDITS (RATA)

These audits ensure precise emissions data validation for continuous air emission monitoring online analyzers, improving regulatory compliance and strengthening our ability to track and reduce emissions effectively.

AIR EMISSIONS	SBU	UNITS	2022	2023	2024
SO ₂ emissions	PetChem	MT	0.10	34.75	39.42
	Downstream	MT	465.30	466.47	467.64
	TASNEE	MT	465.40*	501.22	507.07
SO ₂ emissions intensity	PetChem	MT/1000 MT production	0.00002	0.00810	0.00929
	Downstream	MT/1000 MT production	3.07	2.69	2.63
	TASNEE	MT/1000 MT production	0.11	0.11	0.10
NO _x emissions	PetChem	MT	86.00	710.24	934.75
	Downstream	MT	1,483.00	1,478.00	1,481.63
	TASNEE	MT	1,569.89	2,188.24	2,416
NO _x emissions intensity	PetChem	MT/1000 MT production	0.02	0.17	0.22
	Downstream	MT/1000 MT production	9.78	8.53	8.34
	TASNEE	MT/1000 MT production	0.37	0.49	0.5

Note: Metallurgy SBU is not included in this table as NOx and SOx emissions are negligible by its process nature.

ENERGY EFFICIENCY & RENEWABLE INTEGRATION

Energy efficiency is a significant potential lever in our work to reduce carbon emissions. Our energy management framework ensures that our operations not only meet but often exceed regulatory requirements, aligning with the Saudi Energy Efficiency Center’s (SEEC) standards.

We actively invest in upgrading equipment, optimizing processes, and adopting innovative technologies to enhance performance and reduce energy consumption. As part of our commitment to best practices, we have obtained ISO 50001:2018 certification, applying a systematic approach to energy management across our production lines.

Employee engagement is a key enabler of achieving energy efficiency. Through workshops and open dialogue, we foster a culture of collaboration, encouraging employees to contribute ideas and solutions that further enhance energy performance. This two-way engagement process has been instrumental in driving operational improvements and efficiency gains.

Each year, we proactively reduce energy consumption by refining processes, upgrading energy-intensive components, and integrating renewable energy solutions. In 2024, we achieved significant milestones, including:

POWER REDUCTION INITIATIVES

Through power factor enhancement and high-density polyethylene (HDPE) extruder variable frequency drive (VFD) upgrades, we achieved a significant total energy use reduction. PetChem’s total energy use decreased from 60,007,177 GJ in 2023 to 59,171,232 GJ in 2024, whereas the indirect energy use has been improved from 5,245,631 GJ in 2023 to 5,074,294 GJ in 2024.

PETCHEM ENERGY EFFICIENCY

Realized an improvement in energy intensity from 13.99 GJ per MT of production in 2023 to 13.94 in 2024, due to implemented energy initiatives and improved asset efficiency & availability.

OVERALL ENERGY INTENSITY REDUCTION

TASNEE’s total energy intensity has decreased to 13.79 in 2024 from 13.86 GJ per MT of production in 2023, demonstrating a strong commitment to energy efficiency despite of various fluctuations in production output.

ENERGY USE	SBU	UNITS	2022	2023	2024
Direct energy use	PetChem	GJ	53,945,351	54,761,546	54,096,938
	Downstream	GJ	1,079,319	1,075,417	1,078,108
	AMIC	GJ	26,736	17,656	15,125
	TASNEE	GJ	55,051,406	55,854,619	55,190,171
Indirect energy use	PetChem	GJ	5,142,622	5,245,631	5,074,294
	Downstream	GJ	573,967	638,774	649,770
	AMIC	GJ	452,398	775,927	845,753
	TASNEE	GJ	6,168,987	6,660,332	6,569,817
Total energy use	PetChem	GJ	59,087,973	60,007,177	59,171,232
	Downstream	GJ	1,653,286	1,714,191	1,727,878
	AMIC	GJ	479,134	793,583	860,878
	TASNEE	GJ	61,220,393	62,514,951	61,759,988
Energy use intensity	PetChem	GJ/MT of production	14.47	13.99	13.94
	Downstream	GJ/MT of production	10.90	9.90	9.51
	AMIC	GJ/MT of production	17.91	16.11	16.48
	TASNEE	GJ/MT of production	14.36	13.86	13.79

Despite severe ethane curtailments, PetChem achieved record-high production levels in ethylene cracker, propane dehydrogenation (PDH), and high-density polyethylene (HDPE), demonstrating resilience and efficiency in operations. Further reinforcing its commitment to excellence, PetChem successfully completed an external energy management system audit with zero non-conformity reports (NCRs).

To ensure continuous engagement, PetChem periodically distributes sustainability awareness providing key updates about core sustainability KPIs, alongside a dedicated sustainability awareness section. This ongoing communication strategy fosters a culture of sustainability, keeping employees informed and actively engaged in TASNEE's long-term sustainable development goals.

In 2024, PetChem received the International Energy Management Insight Award, recognizing its consistent compliance with ISO- 50001. Moreover, AMIC – Toho received the ISO-50001 certification for energy management system.

CASE STUDY:

BOPP PLANT - ENHANCING DIESEL POWER EFFICIENCY

The BOPP Plant has exceeded the production records in 2024, reaching 59.7 KMT significantly while improving diesel power efficiency. Power consumption per MT have been decreased by 10% and 22% with respect to 2023 and 2022 respectively, because of optimizing diesel generator usage from multiple projects. Moving forward, the plant aims to explore alternative energy sources to reduce its dependability on diesel.

22%

power consumption per MT reduction since 2022

CASE STUDY:

T&I SOLAR PROJECT: ADVANCING RENEWABLE ENERGY

TASNEE's T&I Center has taken a significant step towards Saudi Vision 2030's decarbonization goals by advancing its solar PV installation project. This initiative aims to cover 25% of the center's electricity demand with renewable solar energy. While commissioning on Q3 2025, the project is expected to reduce carbon emissions by 800 MT CO₂e emissions per year, reinforcing TASNEE's commitment to clean energy adoption and emissions reduction as part of its broader decarbonization roadmap.

25%

of the center's electricity demand could be covered with renewable solar energy

EFFLUENTS & WASTE MANAGEMENT

As TASNEE continues to grow and expand, we remain committed to minimizing waste generation across our operations.

Our approach prioritizes waste reduction, reuse, and recycling, ensuring that less waste is sent to landfills while maximizing resource efficiency. By implementing sustainable waste management practices, we aim to align with the best environmental practices and contribute to a circular economy.

To uphold our legal and environmental responsibilities, TASNEE has established clear targets to ensure compliance with local authority requirements including Royal Commission standards and regulations, focusing on pollution prevention, environmental protection, and responsible waste disposal.

WASTE MANAGEMENT

Each TASNEE plant is mandated to develop a waste reduction plan every five years, thereby ensuring a systematic approach to minimizing waste generation. Additionally, wastewater management is handled by a third-party provider approved by local authorities and the National Centre for Waste Management (MWAN), ensuring that disposal in landfills adheres to all regulatory requirements. Through these efforts, TASNEE strengthens its sustainable waste management framework by developing related policies, procedures and SOPs, aligning national and international environmental standards.

In general, reduction and reuse are cost-saving, resource-conserving, environmentally sound alternatives to traditional forms of solid waste management. The circular economic system is built around the re-use of these resources, again and again; which is a model that can be adapted to incorporate the world's excess carbon. Reinforcing our commitments to circular carbon economy framework for managing and reducing carbon emissions; It is a closed-loop system involving 4Rs: reduce, reuse, recycle, and remove.

As part of circular economy model, PetChem achieved 22% reduction in total waste disposal for the reporting Year 2024, falling from 9,155 to 7,126 MT. At the same time, the recycling concept adopted to collect and process the materials that would otherwise be thrown away as trash and turning them into new products by its own and /or approved third party service providers. PetChem has recycled their waste at maximum extent by 66% for reporting Year as increased by 14.7%, from previous year recycling intensity figures (57.36%). At AMIC, the percentage of recycled waste increased significantly from 15.25% in 2023 to 21.35% in 2024. This represents not just an increase but a substantial improvement of approximately 40% in the rate of recycling with respect to previous year. Indeed, these commitments and initiatives demonstrate the effectiveness of enhanced waste management practices.

22%

reduction in total waste disposal in PetChem

At TASNEE including all affiliates, the waste disposal quantities have reduced to 67,793.47 MT in 2024 from previous Year disposal quantities (70,683 MT). However, waste recycling has increased by 9%, reaching 15,132 MT. The proportion of recycled waste with respect to total waste generated also saw a notable rise, mounting to 18.25% in 2024 from 16.41% in 2023, representing an impressive 11% improvement in just one year.

11%

improvement in the waste recycling/reuse rate was achieved in just one year

CASE STUDY:

ROWAD NATIONAL PLASTIC COMPANY
(RNP) RECYCLING: INCREASING
UTILIZATION OF RECYCLING PLANT

In 2024, RNP achieved its highest-ever recycling capacity, reaching 83% utilization and producing 13.4 KMT, surpassing the previous record of 11.8 KMT in 2023. The initiative focused on turning plastic waste into reusable products, significantly contributing to environmental sustainability by preserving resources, reducing dependency on sanitary landfills, and minimizing GHG emissions. Key efforts included plastic waste collection, sorting, washing, shredding, compounding, and reusing materials. Looking ahead, RNP Recycling aims to fully utilize its recycling plant, expand its recycled plastics portfolio, and develop value-added HDPE, LDPE, and PP products.

83%

utilization

CASE STUDY:

BOPP PLANT: REDUCING NET WASTE
WITH RECYCLED MATERIALS

The BOPP Plant significantly reduced net waste in 2024 by increasing the use of recycled materials in its production process. Net waste dropped to 0.13% of raw material consumption, saving approximately 500 MT of raw materials. This was achieved by increasing recycled material usage in value-added films and continuously optimizing recipes to improve efficiency. The company plans to further reduce waste by enhancing production processes and reducing rejection rates, aligning with global efforts to minimize plastic waste.

0.13%

net waste

WASTE MANAGEMENT	SBU	UNITS	2022	2023	2024
Total waste disposed	PetChem	MT	11,178	9,155	7,126

	AMIC	MT/1000 MT production	14.86*	33.56*	14.84
	TASNEE	MT/1000 MT production	1.37*	1.58*	1.51

*Data has been recalculated following internal validation conducted by the ESG and Sustainability team to ensure accuracy and reliability in reporting.

Note: Waste statistics are disclosed limited to all industrial waste excluding turn around maintenance (TAM) waste and municipal waste.

MATERIAL LOSS

Material losses – including but not limited to flaring, process venting, fugitive emissions, and hazardous/non-hazardous waste – can have a substantial environmental impact if not properly managed. To mitigate these risks, TASNEE has implemented rigorous monitoring systems across all SBU's/BU's and operations to ensure all material losses are tracked and minimized.

Through proactive management strategies, we continuously refine our processes to reduce emissions, improve resource efficiency, and enhance waste control. These efforts align with our broader sustainability goals, reinforcing environmental responsibility and regulatory compliance while optimizing operational efficiency.

In 2024, TASNEE continued to enhance operational efficiencies, leading to further reductions in material losses across all business units.

- Downstream achieved a material loss reduction of approximately 4.5 %, falling from 8,274 MT in 2023 to 7,905 MT in 2024, with a material loss intensity of 0.04.
- PetChem managed to achieve 4.6% reduction by bringing down the material losses to 116,073 MT in 2024 from the previous year records which is 121,621 MT, correspondingly to maintain the material loss intensity at 0.03.
- AMIC material losses decreased by 15.3 % in 2024, with material losses shifting from 2,681 MT in 2023 to 2,270.5 MT in 2024, and a material loss intensity of 0.25.

MATERIALS	SBU	UNITS	2022	2023	2024
Material loss	PetChem	MT	125,759	121,621	116,073
	Downstream	MT	10,167	8,274	7,905
	AMIC	MT	1,860	2,681	2,270.5

	AMIC	MT/MT of production	0.28	0.22	0.25
	TASNEE	MT/MT of production	0.03	0.03	0.03

CASE STUDY:

RASASS PLANT: REDUCING SLAG WASTE

In 2024, the RASASS Plant achieved a slag waste percentage of 16%, surpassing its target of 17%. By optimizing raw material use, adapting efficient recipes, and maintaining melting-cycle times, the plant minimized the environmental impact of slag waste, which can cause soil and water contamination. Future efforts include advancing oxy-fuel burner technology, digitizing smelting processes, and finalizing agreements with cement companies for slag recycling to further reduce waste.

16%

slag waste percentage target achieved

HAZARDOUS MATERIALS & CHEMICAL SAFETY

SPILL PREVENTION

TASNEE is committed to preventing spills involving hazardous materials that can pose significant risks to the environment and local communities. Our approach is guided by strict pollution prevention measures, ensuring compliance with legal and regulatory obligations. Through proactive management and rigorous safety protocols, we work to prevent spills entirely or, in the rare event of an incident, ensure swift and effective containment and remediation.

Zero

spills recorded by TASNEE across all SBUs in 2024,
due to our robust spill prevention strategy

At PetChem, we have conducted comprehensive environmental impact assessments (EIA) to evaluate and manage environmental risks. Our emission sources are equipped with the best available techniques (BAT) to comply with legal emission limits, while the Fugitive Emission Monitoring Program and Leak Detection and Repair (LDAR) initiative help identify and quantify volatile organic compounds (VOCs) and hazardous air pollutants (HAPs) including toxic emissions management and control. As a result, TASNEE has maintained full regulatory compliance

for the last three consecutive years in a row, with no environmental fines or penalties imposed.

Chemical safety is a top priority, and TASNEE strictly adheres to chemical handling procedures and policies to ensure the safe identification, storage, and transportation of hazardous chemicals. We enforce administrative controls, including safety procedures, awareness programs, and Safety Data Sheets (SDS), alongside engineering controls to mitigate risks during production. Also, PetChem has implemented the Zero Leak Program, a proactive initiative designed to detect and control potential hazards, reducing risks for both employees and the surrounding community.

To further enhance chemical safety and regulatory compliance, Petrochemical SBU Chemical Sourcing Committee oversees procurement and supply chain strategies, ensuring alignment with environmental, safety, and transportation standards. By integrating safety-driven initiatives, such as the Zero Leak Program and enhanced compliance measures, TASNEE continues to prioritize workplace safety, environmental protection, and responsible chemical management, reinforcing our commitment to sustainable and ethical operations.

NOISE

TASNEE recognizes noise pollution as a significant environmental and occupational concern, impacting both employees and surrounding communities. To mitigate these effects, we continuously monitor noise emissions, identifying potential issues and implementing control measures to minimize disruptions.

All high-noise equipment is designed to comply with occupational noise limits, ensuring a safe working environment. We also conduct regular noise monitoring across our facilities, with annual third-party audits to verify compliance with the Local Authorities noise standards.

Noise management is a core element of our Environmental, Health, Safety, and Security (EHSS) Policy. Through proactive monitoring and strict regulatory adherence, TASNEE continues to uphold the best practices in noise control, ensuring a safer, more sustainable operational environment.

FLARING

In 2024, TASNEE continued to prioritize minimizing flare emissions as part of our environmental stewardship efforts. At PetChem, flaring levels decreased significantly by 23% compared to 2023, dropping from 58,067 MT to 44,736 MT. We keep maintaining flaring emissions at PetChem as per Royal Commission requirements, despite production level variation and process upset situation. Flaring remains a necessary safety measure for the controlled disposal of hydrocarbons during non-routine operations, such as plant startups, shutdowns, and emergency outages. However, the company consistently implements measures to reduce flaring wherever possible, utilizing it as a KPI for material loss.

CASE STUDY:

B&L BU: REDUCING LEAD LEVELS

The Batteries and Lead Business Unit (B&L BU) made significant progress in reducing lead exposure among employees. Through its Blood Lead Level (BLL) strategy, the average lead level in employees decreased from 32.5 µg/dL in 2023 to 31.5 µg/dL in 2024. This was achieved through continuous engineering and administrative controls, adherence to environmental certifications, and enhanced safety education. Moving forward, the BU plans to improve air quality in plants, implement new safety initiatives, and further strengthen its safety culture to protect employee health.

Polymer plant gases are typically redirected to monomer plants, effectively eliminating the need for process flaring under normal operating conditions. Additionally, Downstream and AMIC continued their record of zero flaring during the reporting year 2024, demonstrating TASNEE’s ongoing commitment to sustainable and responsible operations.

PETCHEM FLARING (MT)

FLARING INTENSITY (M³/MT OF PRODUCTION) - PETCHEM

* Figures have been restated due to a change in units for more accurate measurement and reporting alignment.

WATER CONSERVATION STRESS & RESOURCE EFFICIENCY

Access to clean and fresh water is a fundamental human right as outlined in the UN SDG's. However, in many regions, including our own, water scarcity continues to pose water stress challenges for people, businesses, and the environment. As climate change intensifies, the responsible and efficient use of water is more critical than ever to mitigate depletion and prevent pollution.

TASNEE has a comprehensive water management approach aimed at minimizing freshwater consumption, optimizing water efficiency, mitigating water stress and ensuring wastewater treatment compliance with regulatory requirements.

At PetChem, approximately 99% of the water supply is seawater used for cooling, sourced from a third party. PetChem employs a closed-loop cooling system and pre-treats wastewater before sending it to an external facility, integrating advanced technologies to enhance efficiency and sustainability.

PetChem has actively enhanced its water management practices as an integral component of its sustainability program. A significant achievement in this initiative was the repair of a ruptured Glass Reinforced Plastic (GRP) header in the cooling water loop. This fix significantly enhanced the reliability of water systems throughout the complex.

PetChem manages, monitors and analyzes water consumption across its operations effectively. This is achieved through flow transmitters (FT) installed on every line, allowing us to accurately measure water consumption and usage distribution. This process helps PetChem identify opportunities to increase efficiency and promote sustainable water use. Additionally, PetChem fosters a culture of water conservation within its workforce by distributing educational flyers that emphasize the importance of water conservation and encourage all employees to adopt these practices.

PetChem routinely assesses the condition of steam traps, replacing any defective units. This not only ensures the efficiency of steam trap systems but also aligns with the overarching objective of sustainable water management. Regular evaluations and upgradation of steam traps further improve system efficiency.

Moreover, PetChem has optimized the operation of its seawater pumps, adjusting them to run only as needed, which has greatly reduced seawater intake. These thorough and deliberate efforts showcase PetChem's strong commitment to sustainable water management and resource optimization.

In 2024, TASNEE's total freshwater consumption increased to 4,377,914 m³ compared to the previous year's consumption 4,212,443 m³; which was driven by increased production across various SBUs. Furthermore, its intensity for freshwater use at TASNEE has increased for the reporting Year to 0.98 m³/MT which is 4.7% more than the previous year performance (0.93 m³/MT). Across the company, water recycling and reuse remain a priority. In 2024, TASNEE achieved a 3% increase in total water, recycling reaching 12,259,511 m³.

SUSTAINABLE PRODUCT STEWARDSHIP

TASNEE is committed to delivering high-quality, sustainable products that meet the highest international standards. Our products comply with global standards and regulatory requirements, including ISO and Responsible Care® requirements certifications, ensuring excellence in quality, environment, safety and security systems management.

TASNEE has qualified to hold ISO9001:2015 (Quality Management System) and ISO14001:2015 (Environmental Management System) certifications for all its affiliates; also maintain the global chemical industry's specifications and obtained Responsible Care® accreditation (RC14001:2023), that shows commitment to responsible waste management, resource efficiency, and workplace safety and security. TASNEE maintain these certifications annually followed by internal and external audit surveillances to meet the best practices.

TASNEE is at the forefront of green product innovation, manufacturing recyclable plastic pellets such as PP, LDPE, and HDPE. Additionally, we produce Dibal, a sustainable super absorbent polymer (SAP) used in agriculture to enhance soil water retention, reducing water consumption while maintaining soil health. These sustainable solutions contribute to circular economy principles and resource efficiency.

Our Product Stewardship Policy, Strategy, and Procedures ensure compliance with all regulatory requirements,

safeguarding health, safety, and environmental protection throughout the product lifecycle. We provide essential documentation such as technical data sheets, safety data sheets, regulatory declarations, product labeling, and handling guidelines to support safe and responsible product use. Our polymer products comply with global regulations, including European REACH registration, Turkish KKDIK pre-registration, and BIS (India) certification. Products intended for food contact comply with Good Manufacturing Practices (GMP) under EU Regulation (EC) No 2023/2006, ensuring strict control over raw material qualification, manufacturing, packaging, and storage.

In alignment with its sustainability goals, PetChem launched an Operation Clean Sweep initiative in 2024, aimed at enhancing environmental responsibility, improving workplace safety, and strengthening sustainability efforts within the Gulf Cooperation Council (GCC) polymer supply chains. Through these milestones, PetChem continues to set industry benchmarks for efficiency, sustainability, and responsible operations. In addition to implementing a policy for product safety and quality stewardship.

CASE STUDY:

STRENGTHENING PRODUCT STEWARDSHIP AND REGULATORY COMPLIANCE

TASNEE ensures regulatory compliance and maintains global market access through continuous product stewardship efforts. The company successfully completed key regional registrations, including Turkish REACH (KKDIK) for all products, EU REACH registration for over 1,000 MT of polyethylene and polypropylene products, and Bureau of Indian Standards (BIS) compliance for PP grades and PP/PE compounds. To sustain market presence, TASNEE actively updates its product stewardship register and pursues new regulatory approvals, ensuring compliance with global standards such as EU REACH, Turkish REACH, and BIS India.

CASE STUDY:

ROWAD INTERNATIONAL GEOSYNTHETICS: EXPANDING GEOSYNTHETIC PRODUCT SALES

Rowad International Geosynthetics (RIG) posted record-breaking sales in 2024 by securing contracts for mega projects across the Kingdom and the Middle East and North Africa (MENA) region. The geomembrane products, widely used in landfill waste management, mining, and water containment, played a crucial role in environmental protection by preventing leaks and contamination. The unit achieved 19 KMT in sales volumes, demonstrating its commitment to providing innovative solutions for sustainable infrastructure. Future plans include targeting new markets, enhancing profitability with value-added products, and exploring opportunities in Western Africa, Europe, and the Americas.

HEALTH & SAFETY

ALIGNMENT WITH UN SDGs:

PROTECTING OUR PEOPLE & COMMUNITIES

At TASNEE, the health and safety of our employees and contractors is our top priority. We are committed to fostering a strong safety culture across all our operations, ensuring that stringent safety standards and requirements are met at every level. Our robust Environment, Health, Safety, and Security (EHSS) strategy includes preventative policies, procedures, and emergency preparedness guidelines, designed to mitigate risks and enhance workplace safety. In the event of a health and safety-related incident, we have thorough response protocols in place, ensuring immediate action, detailed investigations, and root cause analysis. These measures allow us to identify key learning points and implement corrective actions to prevent recurrence.

TASNEE is a proud member of the global Responsible Care® initiative, aligning with a shared vision for environmental, health, and safety excellence. We also maintain ISO45001:2018 certification for Occupational Health and Safety Management, which guides our processes and protocols to uphold a safe and compliant working environment. By continuously strengthening our safety measures and enhancing our EHSS framework, we strive to maintain a zero-harm workplace, ensuring the well-being of our people while driving operational excellence.

MATERIAL ISSUES

-  Occupational Health and Safety

ALIGNMENT WITH SAUDI VISION 2030:

-  A Vibrant Society
-  A Thriving Economy

OUR EHSS JOURNEY

CONTINUOUS IMPROVEMENT

TASNEE’s Journey Toward EHSS Excellence program is a structured initiative aimed at enhancing EHSS performance and ensuring compliance with industry best practices.

The program provides a comprehensive assessment of our safety framework, allowing us to identify strengths, address gaps, and implement targeted improvements at all SBU’s, BU’s and cascading down to the department level. By fostering a proactive safety culture, we continuously refine our processes to mitigate risks and drive operational excellence.

As part of this initiative, PetChem has established 143 KPIs, systematically monitored on a monthly basis to track compliance and progress. Regular EHSS audits ensure that corrective actions are effectively implemented, reinforcing our commitment to continuous improvement. The KPIs are categorized into five main groups with 18 subcategories. This enables a comprehensive, data-driven approach to EHSS performance management, as illustrated here.

EHSS STEERING COMMITTEE

TASNEE’s EHSS Steering Committee convenes quarterly, bringing together both management and non-management representatives to ensure diverse perspectives are reflected in decision-making. The Committee plays a critical role in driving EHSS improvements, offering recommendations to enhance existing systems and practices while ensuring alignment with industry standards and regulatory requirements.

Key responsibilities include reviewing EHSS-related KPIs, monitoring plant performance, assessing incident reports, and overseeing safety campaigns. The Committee also identifies workplace challenges, explores potential risks, and proposes practical solutions to strengthen EHSS performance across all operations. Through this collaborative approach, TASNEE reinforces its commitment to a safe, compliant, and continuously improving work environment.

A CULTURE OF CARE

OCCUPATIONAL HEALTH & SAFETY

At TASNEE, we believe that a healthy workforce is a more productive and engaged workforce. When employees experience high levels of well-being, they are less likely to be absent due to illness making them better equipped to contribute positively to our overall success

To support this, we have established comprehensive policies, frameworks, and procedures based on internationally recognized risk management standards, helping to mitigate potential health risks while investing in proactive well-being initiatives.

TASNEE offers comprehensive Occupational Health (OH) Surveillance and Preventive Medical programs designed to promote employee health and well-being. The program includes the following:

- Pre-employment medical examinations
- Periodic medical examinations
- Specialized medical assessments
- Pulmonary protection program
- Immunization program
- Food handling program
- Health promotion initiatives

The programs are audited and certified by an independent third party to ensure we adhere to the best practices and regulatory requirements.

EMPLOYEE PARTICIPATION & HEALTH SERVICES

Employees actively contribute to the development, implementation, and evaluation of the company's occupational health and safety management system. They provide safety recommendations, nominate training programs, and assess the effectiveness of training sessions. We also conduct an annual safety committee meeting, involving worker participation. This meeting serves as a platform to discuss workplace safety challenges and improvements.

To further support employee health, we provide an on-site clinic for first aid and initial medical treatment. If additional care is required, employees are referred to external medical facilities, with coverage provided through a contracted insurance provider across the Kingdom.

Our Healthy Day program offers blood pressure monitoring, blood sugar testing, weight monitoring, hearing assessments, and health education sessions, ensuring employees have access to preventive healthcare and medical guidance. Employee medical records are securely maintained and can only be accessed by authorized medical personnel.

100% 

of employees have been covered under a certified health and safety management system, verified through external audits for the past three years

In 2024, PetChem achieved a major milestone, meeting the stretch target of Process Safety Incident Severity rate, marking a significant advancement in EHSS standards.

WORKPLACE INJURIES

The Lost-Time Injury Frequency Rate (LTIFR) for employees in 2024 was zero – a significant improvement from previous year 2023 records which was 2. Similarly, the Contractor LTIFR decreased in 2024 from 4.102 to 0.79 in comparison with the previous year. The Total Recordable Injury Frequency Rate (TRIFR) for employees dropped from 2.76 in 2023 to 0.35 in 2024, while the contractor TRIFR improved from 3.74 to 2.68 over the same period. These reductions reflect TASNEE’s continued efforts to enhance workplace safety and minimize incidents. All reported incidents were thoroughly investigated, and corrective actions were implemented to prevent recurrence.

OCCUPATIONAL HEALTH AND SAFETY	SBU	UNITS	2022	2023	2024
Total employee man-hours	PetChem	Hours	27,828,359	2,208,400	2,249,263

	TASNEE	Number	233	251	280

In 2024, TASNEE delivered a total of 4,477 hours of comprehensive health and safety training to both employees and contractors. These training hours ensure employees and contractors are equipped with the necessary knowledge to maintain a safe working environment.

Notably, contractor health and safety training hours increased from 1,111 hours to 1,417 hours in 2024 from the previous year, representing a 27.5% growth, strengthening contractor safety awareness and compliance.

HEALTH AND SAFETY TRAINING	SBU	UNITS	2022	2023	2024
Employee health and safety training	PetChem	Hours	1,087	1,114	1,049

In 2024, AMIC Toho Titanium Metal Company Ltd. (ATTM), a joint venture between Advanced Metal Industries Cluster Company Ltd. (AMIC) and Toho Titanium Company, achieved significant milestones in safety enhancement and regulatory compliance. All mandatory training sessions were successfully conducted for site stakeholders, ensuring adherence to the highest safety standards. The training programs covered fire watch, gas detection, firefighting, permit-to-work, the Lockout-Tagout (LOTO) system, first aid, and confined space entry, among others. These sessions have been instrumental in strengthening the Safety Management System (SMS), leading to improvements in the Total Recordable Incident Rate (TRIR) and overall EHSS performance. The year concluded on a strong note, meeting our stretched TRIR target and zero process safety incidents were reported. Additionally, HCIS compliance saw notable progress, marked by the installation of 22 additional CCTV cameras and also HCIS has approved our new EHSS structure.

As part of efforts to foster a proactive safety culture, ATTM introduced the Best Employee of the Month Award initiative in 2024. This program aims to recognize and reward employees who demonstrate exceptional contributions to safety, health, or environmental improvements. Each month, three awards – one for each process area – are presented to employees with the most impactful ideas or initiatives. The program has strengthened collaboration, innovation, and employee engagement, encouraging a more safety-conscious work environment. Looking ahead, the department is committed to sustaining and expanding this practice to further embed a culture of safety, recognition, and continuous improvement.

EMPLOYEE WELL-BEING & WELLNESS PROGRAMS

At TASNEE, we recognize that health and well-being are fundamental to workplace safety. Our well-being approach focuses on both short- and long-term preventive measures, ensuring employees have access to the resources they need to maintain their health. Employees are actively encouraged to participate in annual health screenings, which play a critical role in the early detection of potential health issues and provide guidance on necessary support.

1,301 
health screenings completed in 2024

HEALTH SCREENING

Promoting employee well-being goes beyond just safety; it involves creating an environment that supports active and healthy lifestyles. TASNEE organizes awareness campaigns focused on key health issues, empowering employees to make more informed and healthier choices. All employees are eligible for annual health screenings, and in 2024, we completed 1,301 screenings – a 6% increase from 2023.

HEAT STRESS PREVENTION

With respect to Saudi Arabia's extreme summer temperatures, heat stress is a critical workplace concern. TASNEE proactively integrates heat stress mitigation into risk assessments, implementing precautionary measures that have resulted in a steady decline in heat-related cases year after year. During the summer months, we enhance our efforts through targeted awareness programs and specialized training, educating workers on the causes, risks, and treatment of heat stress. Our comprehensive approach has proven highly effective, and for three consecutive years, we have recorded zero heat stress cases, underscoring our dedication to employee safety and well-being.

EMERGENCY PREPAREDNESS, RESPONSE & CRISIS MANAGEMENT

At TASNEE, for all its sites, we ensure the availability of critical resources and well-defined procedures for effectively responding to potential incidents such as spills, leaks, fires, explosions and natural disasters.

These emergency response protocols are regularly tested through mock drills for each respective scenario, with employees trained and continuously updated on emergency management techniques. We also invest in cutting-edge technologies to enhance our emergency response capabilities, ensuring we remain prepared for any situation.

In 2024, TASNEE conducted 59 emergency response drills across its SBUs, marking a 34% increase from 2023. This improvement reflects our ongoing commitment to preparedness, maintaining high safety standards, and proactively identifying and addressing system vulnerabilities. Across all business units, emergency response drills increased significantly. For instance: Downstream drills increased from 21 to 36, while AMIC drills rose from 16 to 17 in reporting year 2024 compared to the previous year.

We remain an active member of JAMAA, which provides specialized training and emergency response exercises. In 2023, PetChem achieved a 100% score in JAMAA's annual drill evaluation. Looking ahead, we will continue enhancing our emergency preparedness initiatives, ensuring swift, effective responses to any potential incidents while prioritizing the safety of our employees and operations.

Metallurgy SBU successfully conducted an emergency drill approved by HCIS in collaboration with external stakeholders including Jazan Royal Commission and Civil Defense.

PROCESS SAFETY & ASSET INTEGRITY

We continuously monitor asset performance and business operations, conducting regular inspections, equipment testing, and sound engineering assessments, all underpinned by a robust risk management framework. By proactively identifying potential vulnerabilities, we ensure the reliability, efficiency, and safety of our operations.

Across our sites, we systematically identify, manage, and mitigate both internal and external risks, including:

Recurring process safety incidents resulting from non-compliance with Process Safety Management System requirements or ineffective system implementation.

Workplace safety challenges and risks to the integrity of operating systems and processes that handle hazardous substances.

To mitigate these risks, we operate an integrated risk identification and mitigation system mapping emerging trends, enabling us to preemptively limit or eliminate potential disruptions. This proactive approach enhances operational excellence, improves productivity, and reinforces workplace safety.

Our comprehensive risk management practices cover health, fire prevention, security, safety, and environmental protection across all project phases – from planning and construction to daily operations. We regularly review and update our management systems in response to regulatory changes, operational developments, and evolving industry standards. Additionally, we conduct formal risk analysis and risk revalidation studies every five years, ensuring our systems remain current, effective, and aligned with best practices.

TASNEE’s asset management strategy is built on a comprehensive life cycle program, designed to ensure long-term reliability, efficiency, and sustainability of physical assets. This approach aligns with stakeholder objectives, translating corporate growth aspirations into actionable, plant-level goals through strategic asset management objectives.

By integrating asset management activities, we have created a cohesive and cost-effective framework that optimizes the entire asset life cycle. This fosters transparent decision-making, effective information management, and operational resilience. Recognizing its critical role in sustaining performance, our asset management framework aligns with ISO 55001, a globally recognized standard for asset management excellence. Ranked just behind quality management in its influence, ISO 55001 plays a pivotal role in ensuring the long-term efficiency and reliability of our operations.

HUMAN CAPITAL & TALENT DEVELOPMENT

INVESTING IN OUR PEOPLE

Our people are TASNEE's most valuable asset. As such, we are committed to recruiting, retaining, and developing top talent while providing opportunities for employees to reach their full potential and build fulfilling careers. This is a belief embodied in our slogan, 'One TASNEE, One Team.'

Our human capital development strategy is built on continuous learning, career growth, and empowerment. We achieve this by offering high-quality training programs, investing in digital technology, applying best-practice recruitment techniques, fostering career progression, enriching job roles, and equipping employees with the tools to succeed. Through this approach, we cultivate a workplace culture that champions diversity, excellence, and innovation, ensuring that our people remain at the heart of our success.

ALIGNMENT WITH SAUDI VISION 2030:

- A Thriving Economy
- A Vibrant Society

ALIGNMENT WITH UN SDGs:

UPSKILLING & WORKFORCE DEVELOPMENT

At TASNEE, we are committed to providing a workplace where every employee can reach their full potential. By prioritizing talent development and training, we continue to attract, retain, and empower top talent, ensuring that as our people grow, so does our company’s success.

SUPPORTING YOUNG PEOPLE

We place strong emphasis on preparing young professionals for their future careers through a range of early career support initiatives. In 2024, our youth development programs enrolled 28 trainees, including the Youth Development Program, Saudi Early Engineers Development Program, TASNEE Development Program for Operators and Technicians in Jubail, and the Downstream Graduate Engineering Development Program. We also launched the Tatwar Training Program, designed to develop young Saudi talent by equipping them with essential ‘soft skills’ for professional growth. These initiatives run alongside a cognitive educational series that integrates on-the-job skills and competency training.

We also support young leaders and female workforce empowerment through Saudization programs facilitated by the Ministry of Human Resources and the Human Resources Development Fund (HADAF).

TASNEE’s Leadership Competency Model defines the skills, behaviors, and attributes essential for effective leadership. This model serves as a strategic framework for leadership development, recruitment, performance evaluation, and succession planning, ensuring the long-term sustainability of TASNEE’s leadership pipeline.

We continue to drive digital transformation in HR, implementing key initiatives such as the FM (Facility Management) Ticketing System, Robotics Solutions for Mobile Billing Verification within Payroll Systems, and a new Attendance System. In addition, we successfully introduced our E-Curricula Program, offering a flexible, customizable suite of eight online learning tracks to promote structured career growth, self-directed learning, and ‘learning on-the-go.’

In 2024, TASNEE reinforced its commitment to excellence and innovation by participating in the prestigious Top Employers Certification Program, successfully completing a detailed survey covering over 300 HR practices. Additionally, we finalized the Internal Capabilities Program to introduce structured tracks for internal trainers, content creation, knowledge sharing, and youth training.

A strong focus on youth development continued in 2024, with expanded training programs and increased intake. Further advancements included the successful completion of the SuccessFactor (SF) H2 upgrade and User Acceptance Testing (UAT) for The Advanced Smelting Industries Company (ASIC) HR businesses, alongside the smooth rollout of ASIC employees. These achievements reflect TASNEE’s dedication to fostering a dynamic, forward-thinking HR function that empowers its workforce, strengthens governance, and drives digital transformation.

In 2024, TASNEE’s commitment to workforce development resulted in a 27% increase in total training hours, reaching 132,648 hours in totality. Employees received an average of 42 training hours each. A significant increase in training participation was observed across all employee levels and demographics. Training hours for male employees have raised to 129,586, and female employees received 3,062 hours of training, marking a substantial improvement from 2023. Additionally, it’s more than doubled for executive and senior leadership training, reaching 836 hours, while middle management and staff training increased to 19,777 and 112,035 hours, respectively.

Despite the increase in training hours, the total cost of training decreased to SAR 4.6 million for the reporting year, compared to SAR 6.08 million in 2023. This cost reduction was achieved by leveraging digital learning platforms and shifting towards online and on the job training, making professional development more accessible and cost-efficient.

In 2024, we enhanced our robust Learning and Development Framework by introducing and aligning programs to sustain, upskill, and reskill our workforce effectively. Such initiatives included the launch of the TASNEE 8 Development Programs, a structured learning framework consisting of eight levels tailored for different job levels. Each program offered employees relevant training to help them develop key skills and support their career growth.

Additionally, we organized a Learning Week, introducing six public training sessions conducted both face-to-face at the HQ and virtually, with a total attendance of 2,668. Furthermore, we implemented the Tatwar Training Program specifically for young employees, offering five courses to equip them with skills and knowledge, facilitating a smooth transition into the workplace.

TALENT ATTRACTION & RETENTION STRATEGIES

To drive continuous improvement, TASNEE fosters a workplace culture that respects diversity, encourages self-accountability, and promotes a strong learning mindset. Training and development initiatives are a key component of our talent attraction and retention strategy, ensuring that employees have the skills and knowledge to operate safely and efficiently.

Our market position remains strong. We regularly review our total reward strategies to remain competitive. Our culture defines our strength, and we have implemented proactive recruitment methods, including recruitment marketing and talent pooling, to attract top talent. We have also enhanced critical skills acquisition strategies and streamlined recruitment processes to accelerate hiring while maintaining a focus on candidate quality and long-term fit.

In alignment with Saudi Vision 2030, we prioritize the recruitment and development of young professionals. In 2024, 496 employees at TASNEE were under the age of 30, accounting for 15.4% of the total workforce. While this reflects a slight decrease from 19.4% in 2023, TASNEE remains committed to fostering young talent. Out of 476 new hires in 2024, 49% were under 30, reinforcing our commitment to investing in the next generation of professionals. Additionally, female hires increased to 58, representing an 18% rise from the previous year, highlighting our efforts to enhance workforce diversity and inclusion.

EMPLOYEE ENGAGEMENT & SATISFACTION

At TASNEE, our goal is to create a workplace where every employee feels valued, engaged, and fulfilled. We believe that a highly engaged workforce drives productivity, innovation, and long-term success.

Central to this is fostering a culture of respect, transparency, and open communication where employees’ ideas, concerns, and feedback are actively heard and addressed. Through structured feedback mechanisms and performance reviews, employees can identify strengths, explore development opportunities, and set meaningful career goals.

To enhance employee engagement, we conducted HR Week sessions to educate employees on HR policies and provide a platform for inquiries and career advice. This included management sessions for various role levels. We also conducted satisfaction surveys, held Townhall sessions for employee connection and feedback, and utilized programs like Fikrah in Petrochemical SBU for idea submissions on sustainability and operational efficiency. Also, we sustained the systematic approach to gathering feedback from newly hired employees through onboarding and engagement surveys, thereby ensuring a comprehensive understanding of and enhancing their early-stage experience.

TASNEE fosters a continuous learning culture and promotes a dynamic learning environment through its Internal Capability Program. This program encourages diverse learning opportunities by inviting TASNEE employees to share their knowledge and showcase their talents through four paths: the Internal Trainer Path, where employees create and lead the training sessions; the Content Creation Path, where employees develop training materials and resources in collaboration with the Internal Trainer; the Sharing Knowledge Path, where employees present on specialized topics across large group; and the Youth Internal Trainer Path, where young employees develop their training skills and lead the sessions.

Additionally, TASNEE continues with its endeavor in investing in technology and automation to be at the forefront of leading companies in the industry. In 2024 TASNEE successfully redesigned and digitized more than 30 HR processes in the automated system SAP SuccessFactors, which in turn led to increased utilization of company resources, efficiency of operations and a significant reduction in cost.

With the continued success of our initiatives in 2024 which focused on developing, training, and empowering our employees through the process of continuous performance management. The HR department will continue to support TASNEE to achieve its strategies, goals and objectives and continue its efforts to continuously improve its processes, policies, and procedures, be pro-active in embracing change and overcoming challenges to increase efficiency, productivity and professional satisfaction to the future proofing our human capital. In 2024, we started our first participation in the “Top Employers Certification program” through one of the world’s most prestigious bodies, believing in promoting the value of “excellence” in TASNEE and our confidence in the evolution of our HR practices to the extent that such a program testifies to the competitive advantages offered to our employees.

COMPENSATION & BENEFITS

We provide employees with a comprehensive range of benefits designed to support staff retention and enhance workforce well-being.

EMPLOYEE BENEFITS

-  Medical insurance for employees and dependents
-  Individual development plans
-  Employee training schemes
-  Service awards
-  Education assistance for non-Saudi employee's children
-  Physical well-being programs
-  Defined contribution pension/benefit plan

We also offer WalaPlus (branded as Testahel at TASNEE), a discount and benefits program tailored for employees and their families. The program operates across a network of more than 5,000 retail locations, and features an online discount portal, regularly updated promotional offers, and exclusive vouchers.

TASNEE also offers a defined contribution plan, allowing eligible employees to save for their future with company-matched contributions, reinforcing our commitment to long-term financial security for our workforce.

To further support work-life balance, we have streamlined access to parental leave through our HR system. In 2024, a total of 178 employees took parental leave, including 173 male and 5 female employees. TASNEE achieved a 100% return-to-work rate, with all employees resuming their roles after leave. Additionally, 172 employees (167 male and 5 female) remained employed 12 months after their return, reflecting a 97% parental leave retention rate.

DIVERSITY, EQUITY AND INCLUSION (DEI) IN THE WORKPLACE

A diverse workforce strengthens an organization, bringing a variety of perspectives, ideas, and experiences that better reflect the diverse nature of our customers and markets.

At TASNEE, we are committed to fostering an inclusive workplace and have focused our diversity efforts on gender and broader representation. While we recognize that there is still more to achieve, we are proud of our progress and remain dedicated to building an equitable work environment.

Our commitment to workplace equality is reflected in two key policies: the Equal Employment Opportunity Policy and the Diversity, Equity, and Inclusion (DEI) Policy, both of which reinforce our belief in respect, inclusion, and fairness for all employees. We maintain a zero-tolerance approach to harassment and discrimination. All allegations are taken seriously, thoroughly investigated, and addressed through due process.

We are also committed to upholding and respecting human rights across all operations. Every employee is required to adhere to our Code of Conduct, which includes clear commitments to fairness, equality, and human rights principles.

In alignment with Saudi Vision 2030, TASNEE continues to increase female representation in the workforce by adopting women-friendly policies and creating professional development opportunities. In 2024, the number of female employees increased by 63%, with 13 women now holding middle management positions, up from 8 in 2023. Additionally, we have introduced initiatives such as the E-Curricula Program, leadership training, and mentorship programs to empower female employees, enhance their career growth, and enrich their workplace experience.

increase in the number of female employees

SAUDIZATION & LOCAL WORKFORCE DEVELOPMENT

As a major Saudi employer, TASNEE plays a key role in advancing Saudization and developing local talent in alignment with Saudi Vision 2030. Saudization is a core pillar of our strategic workforce planning, ensuring that we contribute to national economic development while building a strong, sustainable talent pipeline.

Our Saudization program is designed to attract, empower, and retain talented Saudi nationals, with a particular focus on young professionals advancing into technical, skilled, and leadership roles. This is supported by targeted training and development programs, equipping them with the necessary skills for long-term career growth.

In 2024, TASNEE’s Saudization rate is 57% by sustaining the similar as of 2023, further demonstrating our commitment to workforce nationalization. The proportion of female Saudi employees also increased by 23%, reaching 125 employees.

While progress has been made, TASNEE remains focused on increasing Saudization rates, particularly among women, young professionals, and senior leadership roles. The current Saudization rate in senior management declined slightly from 75% to 74% in 2024. However, we continue to develop leadership programs and career progression pathways to ensure more Saudi professionals advance into senior positions.”

RESPONSIBLE BUSINESS & ETHICAL GROWTH

TASNEE is committed to upholding the highest standards of ethics, compliance, and accountability by continuously enhancing our governance, risk management, and auditing controls. Every employee is expected to demonstrate ethical and professional integrity, ensuring that our business practices align with global best practices and standards. Our robust governance framework reinforces accountability, allowing us to proactively identify risks and address challenges.

Corporate governance is at the core of our culture. It is built on clearly defined values, strong internal controls, and a structured compliance framework. This commitment extends beyond our operations and into our supply chain, where we expect suppliers, partners, and stakeholders to adhere to the same ethical principles. Our Responsible Supply Chain Framework, which includes a comprehensive Code of Conduct, ensures that compliance, ethics, and responsibility are embedded throughout our business ecosystem. By fostering a culture of integrity and transparency, we reinforce our long-term commitment to sustainable and responsible business practices.

ECONOMIC & BUSINESS PERFORMANCE

CREATING LONG-TERM VALUE

TASNEE strives to be a profitable, growing, and sustainable company, committed to maintaining competitiveness and consistently delivering on our commitments to stakeholders.

In exchange for delivering strong returns, we also make meaningful contributions to the communities where we operate. More than 59% of our revenue is generated within the Kingdom, with an additional 18% coming from the wider Middle East region.

To ensure ongoing profitability, while minimizing our environmental impact, and achieving financial results that surpass stakeholder expectations, we continuously innovate by implementing operational improvements and cost efficiencies. This allows us to remain competitive in an ever evolving market while maintaining a strong and sustainable presence across the regions we serve.

In 2024, TASNEE demonstrated strong growth and expansion, with several key financial indicators showing positive trends. Revenues increased from SAR 3.57 billion in 2023 to SAR 3.90 billion in 2024, reflecting improved market performance and higher sales. Total assets grew from SAR 25.38 billion to SAR 26.38 billion, highlighting TASNEE's continued investment in business expansion and operational capacity.

Operationally, total production saw a significant rise, increasing from 454 million MT in 2023 to 549 million MT in 2024, showcasing efficiency improvements and enhanced output. Additionally, employee wages and benefits rose to SAR 562.9 million, demonstrating TASNEE's commitment to workforce development. Payments to the government more than doubled, reaching SAR 215.4 million, reinforcing the company's role as a key economic contributor. These trends reflect TASNEE's focus on sustainable growth, operational excellence, and economic impact.

*Figures restated in accordance with the published financial data on the Tadawul website.

**TASNEE's major joint ventures in Petrochemical Segment are equity-accounted, in compliance with International Financial Reporting Standards (IFRS), for further details please refer to TASNEE's Annual Report 2024.

TASNEE's Petrochemicals SBU played a key role in driving economic growth by achieving strong business performance and expanding its market presence. The Company recorded one of its highest annual polymer sales volumes. It also set a new pricing benchmark record, exceeding the global pricing index (ICIS) for polymers and chemicals. Expansion into European and Latin American markets strengthened its global footprint, while the polymer BU secured higher netbacks in the polypropylene swing market for the fourth consecutive year. Additionally, the rebranding and relaunch of the Super Absorbent Polymer (SAP) business enhanced market position, reinforcing TASNEE's ability to adapt to market shifts.

Aligned with Saudi Vision 2030, TASNEE continued to support downstream industry growth, targeting 160 KMT of polymers and 32 KMT of chemicals in local sales. Investments in digital transformation, including a new Customer Relationship Management (CRM) system, improved customer engagement and operational efficiency. Despite global supply chain challenges, cost optimization measures resulted in significant financial savings. Through strategic feedstock sourcing, the company secured essential raw materials via swaps and deals, ensuring supply stability for 2025. Additionally, enhanced inventory management reduced working capital burdens, while TASNEE's sustainable operations strategy contributed to financial resilience. The introduction of Pygas 4 as a new by-product, alongside an offtake memorandum of understanding (MoU) for 2025, reinforces TASNEE's long-term value creation strategy.

The Downstream SBU experienced a year of continuous improvement, with all business units delivering positive financial results. Strategic initiatives focused on asset utilization, competitive pricing, and operational excellence, leading to a 10% year-over-year (YoY) sales volume

increase. The Plastics BU recorded a 7% YoY sales growth, with Taldeen transforming into a profit-generating entity. Meanwhile, Rowad Geo-synthetics secured major contracts across Saudi Arabia and the Middle East and North Africa (MENA) region, strengthening its market presence. Rowad Global Packaging achieved record sales, with 70% of biaxially oriented polypropylene (BOPP) film production exported while maintaining full plant utilization. National Batteries Company (NBC) launched a high-impact marketing campaign, driving 27% YoY sales growth. Meanwhile, Rasass Company introduced a new high-calcium alloy, securing global approvals and preparing for an expansion by 2027.

The Metallurgy SBU also strengthened its market position by capitalizing on rising titanium demand, particularly in the aviation sector through increased production and improved pricing. TASNEE expanded operations at the Jizan Ilmenite Smelter, improving efficiency and increasing furnace power. Work continued on the Furnace 2 refurbishment in collaboration with a leading technology partner Metso, while the production of high-purity titanium slag and iron products grew for both local and international markets.

Further global market expansion saw the titanium sponge plant (ATTM) secure partnerships in India and South Korea, progressing in its qualification process with European aerospace manufacturers. Meanwhile, the ASIC sales unit contributed to revenue growth by increasing titanium slag and pig iron exports to Italy, Egypt, and India, while prioritizing local supply to strengthen Saudi Arabia's industrial sector. Moving forward, TASNEE remains focused on expanding its customer base, optimizing operations, and enhancing economic value in 2025 and beyond.

STRONG GOVERNANCE & LEADERSHIP ETHICS

TASNEE’s governance structure establishes and clearly defines the company’s expectations for upholding the highest standards of corporate integrity, ethics, and compliance throughout all aspects of the business.

BOARD OF DIRECTORS

TASNEE’s Board of Directors plays a pivotal role in shaping our overall business strategy and direction, while ensuring the highest standards of compliance and governance.

In 2024, the Board consisted of ten members, including five non-executive members and five independent members. Notably, there were no female members on the Board. TASNEE’s executive compensation is aligned with specific performance goals or targets, ensuring that the leadership team is incentivized to meet the company’s strategic objectives.

The Board maintains a clear separation of roles and responsibilities between the CEO and Chairman; with the CEO reporting directly to the Board. The Board is supported by four key committees:

- The Executive Committee
- The Nomination and Remuneration Committee
- The Risk and Governance Committee and
- Audit Committee

TASNEE’s Board Membership Policy emphasizes the importance of a diverse range of skills and backgrounds among Board members, with no discrimination based on gender. The final composition of the Board is largely determined by shareholder voting at the General Assembly, in compliance with applicable regulations.

KEY BOARD COMMITTEES: ROLES AND RESPONSIBILITIES

- Oversees the daily implementation of Board policies, ensuring alignment with strategic goals and operational efficiency.
- Reviews the company's strategic plans, major projects, and annual budget, making recommendations to the Board of Directors for approval.
- Approves policies, procedures, debt instruments, and loans for subsidiaries, exercising all powers granted by the Board.

- Supports the Board in maintaining an appropriate balance of skills within the organization to achieve TASNEE's strategic objectives.
- Proposes clear policies and standards for Board membership and Executive Management appointments.
- Recommends nominees and re-nominees to the Board in alignment with established policies, ensuring compliance with legal requirements and membership criteria.
- Assesses the skills and experience required for Board and executive management roles, ensuring they align with the company's evolving needs.
- Identifies strengths and weaknesses of the Board of Directors and proposes solutions to optimize its performance in the best interest of the company.
- Advises the Board on senior executive remuneration and recommends compensation policies and frameworks for the broader workforce.

- Ensures the company has a comprehensive framework and policies for risk management, governance, compliance, and related matters, ensuring alignment with TASNEE's strategic goals and operations.
- Endorses the risk appetite, establishing acceptable risk levels for the company and reviewing them periodically.
- Monitors the effectiveness of the company's risk management system, identifying and assessing risks to the business and recommending necessary adjustments.
- Reports key risks to the Board of Directors, providing transparency and ensuring informed decision-making at the highest level.
- Works with executive management to develop and refine policies on risk management, governance, and compliance that align with TASNEE's business activities and objectives.
- Reviews compliance policies periodically, ensuring they remain consistent with any changes in the internal or external environment.

- Ensures the effectiveness of internal controls, ensuring compliance with statutory requirements, risk management, internal auditing, and regulatory standards.
- Ensures the integrity, effectiveness, and reliability of the Financial Statements and Internal Control Systems.
- Analyzes Financial Reports and provides its opinion and recommendations to the Board to ensure their integrity, fairness, and transparency.
- Oversight over Internal Audit Activities and following up on the implementation of corrective measures taken.
- Evaluates the independence, objectivity, and fairness of the External Auditor and recommends its appointment. As well as reviewing their activities and attending to their queries.
- Ensuring Compliance by reviewing findings of internal and external audits, including regulatory audits, as well as compliance activities relevant laws, regulations, policies, and instructions.

BUSINESS ETHICS

Ethics and responsible business practices are foundational to maintaining the highest levels of compliance and professional integrity at TASNEE. We have established a comprehensive framework of structures and policies to ensure strict adherence to all applicable legal, regulatory, international standards, rules, and best practices across the company.

Our goal is to foster a culture of transparency, honesty, and trust within our workforce and among all stakeholders, ensuring that we always operate responsibly and ethically.

To achieve this, our compliance procedures are meticulously aligned with both internal and external requirements. These procedures are continuously reviewed and updated, ensuring that they remain relevant, effective, and in line with evolving industry standards and regulatory changes.

TASNEE recorded zero incidents of non-compliance with our Code of Conduct and Business Ethics for the third consecutive year.

Zero

TASNEE for the third consecutive year**

BUSINESS INTEGRITY & COMPLIANCE

ANTI-CORRUPTION

TASNEE regularly conducts risk assessment workshops to evaluate and address various risks within our operations. Commonly identified risks include conflict of interest, bribery and gifts, and inadequate management oversight. To mitigate these risks, we have implemented several preventive measures, including the adoption of a comprehensive Anti-Corruption and Bribery Policy as well as an Antitrust and Competition Policy.

Anti-corruption principles are deeply embedded in our Code of Conduct, and we consistently communicate our expectations and requirements to all employees. Our policies and systems are clearly defined and regularly updated to ensure compliance with Saudi law, which imposes penalties ranging from fines to imprisonment for violations.

In 2024, 85% of our employees completed online training on anti-corruption practices, strengthening our collective commitment to ethical business conduct. Additionally, 100% of our operations underwent corruption-related risk assessments, ensuring that all areas of the business are fully aligned with our ethical standards. Notably, no incidents of corruption or fines occurred during the year, further reflecting our strong compliance culture.

For the past three years, all TASNEE employees, including top management, middle management, and staff, have been receiving training of the organization's anti-corruption policies and procedures.

OPERATIONS ASSESSED FOR RISKS RELATED TO CORRUPTION	UNITS	2022	2023	2024
Percentage of operations assessed for risks related to corruption	Percentage	100	100	100
Number of corruption incidents	Number	0	0	0
Total number of confirmed incidents in which employees were dismissed or disciplined for corruption	Number	0	0	0
Number of regulatory incidents	Number	0	0	0
Number of non-monetary sanctions for non-compliance	Number	0	0	0

CODE OF CONDUCT

TASNEE's Code of Business Conduct is the cornerstone of our business culture, reflecting our unwavering commitment to integrity and ethical behavior across all operations. This Code applies to all TASNEE employees, management, and directors, and it is regularly communicated through emails, mandatory online training, in-person sessions, and annual disclosures. It is readily accessible to all employees via our intranet, ensuring consistent awareness and application.

The Code establishes clear guidelines for the behavior we expect from all employees and reinforces our core values: Excellence, Integrity, Seeking Knowledge, and Teamwork. It also emphasizes our commitment to fair and transparent business practices, the well-being of our employees, and the importance of fostering long-term partnerships with

the communities where we operate. The Code serves as a guide for everyone associated with TASNEE, empowering them to conduct business with integrity, accountability, and transparency.

TASNEE works closely with stakeholders to ensure they are informed about regulatory developments and best practices, helping them maintain a broader perspective and stay compliant in their respective operations. For three consecutive years, TASNEE has not received any regulatory complaints, further validating our commitment to ethical conduct and compliance.

GRIEVANCE REPORTING MECHANISM

TASNEE is committed to fostering a safe and respectful work environment, which includes offering employees effective mechanisms to raise concerns. Our Whistleblowing Grievance and Non-Retaliation Policy ensures that employees can report grievances or non-compliance issues safely and confidentially. Multiple confidential communication channels, such as telephone and online platforms, are available to employees, and they are encouraged and trained to use these channels for reporting concerns.

To protect whistleblowers, we offer guaranteed protection against retaliation for anyone reporting issues in good faith. All reports are treated seriously, and we ensure that violations of the law are reported within 24 hours. We also ensure that all incidents and reports are investigated respectfully, confidentially, and fairly. Under our Code of Conduct, all employees are expected to cooperate honestly and truthfully in any investigation, supporting the company's commitment to maintaining an ethical and compliant workplace.

RISK MANAGEMENT

Effective risk management is essential to TASNEE’s long-term success, ensuring resilience in a changing business environment. Operating in the petrochemical and chemical industries, TASNEE addresses challenges such as geopolitical shifts and inflationary pressures while capitalizing on growth opportunities.

Our risk management framework follows the best international practices, including ISO 31000:2018 and CMA guidelines, ensuring a structured approach to managing operational, financial, and market risks.

TASNEE operates in a highly competitive global market, necessitating continuous risk analysis at all management levels. We combine qualitative and quantitative assessments to implement effective policies while ensuring compliance with regulations. The Board Risk and Governance Committee (RiskCom) provides oversight of risk issues across the company, focusing on governance, compliance, and risk mitigation. RiskCom oversees the development and implementation of TASNEE’s ESG Framework and Policy guiding the company’s ESG strategy, commitments, and key areas of focus, reporting its findings directly to the Board. The Committee also receives periodic updates from management on TASNEE’s ESG framework, policy, and performance.

To strengthen risk resilience, TASNEE’s Corporate Risk Management Team ensures enterprise risk management, governance, and compliance across departments, supporting risk identification and response planning. We maintain a business continuity program, ensuring safety and uninterrupted service delivery during crises. In 2024, TASNEE mitigated feedstock price fluctuations through performance improvements and expenditure rationalization, using hedging strategies to manage financial risks.

TASNEE also continuously monitors regulatory changes to ensure compliance with evolving laws, and enhances the governance guidelines to keep up with new requirements and strengthens compliance among suppliers and stakeholders. In 2024, we updated the Master Authority Schedule to streamline decision-making and implemented the Personal Data Protection Law (PDPL), reinforcing data security and compliance.

A key achievement in digital risk management was the implementation of a new Governance, Risk and Compliance (GRC) system, developed with the cybersecurity team, set to be fully operational in 2025. Looking forward, TASNEE remains focused on proactive risk mitigation, governance improvements, and regulatory compliance to ensure long-term sustainability and resilience.

Our corporate risk management, compliance and governance system has been established to serve the interests of our stakeholders, as well as to enable us to monitor our business’s performance and successfully accomplish our goals and objectives. In our opinion and past trends, successful businesses are built on excellent risk management. TASNEE has implemented a strong risk management, governance & compliance strategy that has recently experienced rapid growth and maturity.

To further enhance our efforts on risk management, compliance and governance in 2025, we will continue to:

-  Enhanced GRC systems for effective and efficient management of risk, governance and compliance
-  Concentrate on risk management, ethics, data management & data privacy compliance
-  Conduct workshops, training sessions, testing of the business continuity plans, and PDPL compliance
-  Development of young individuals under the Youth Development Plan (YDP)

INTERNAL AUDITS

The Internal Audit Department aims to enhance and safeguard organizational value by providing risk-based, independent, and objective assurance, advice, and insights. We conduct assurance audits across our SBUs, which are essential for maintaining and improving governance, risk management, and internal controls. They also ensure accountability to the Board of Directors and shareholders.

Annually, the Internal Audit Department develops a comprehensive audit plan, which outlines regular, thorough audits to identify significant risks. These risks are reported to the Audit Committee and relevant management for timely action. In 2024, we finalized all twelve internal audit engagements.

In line with best practices, Internal Audit functionally reports to the Audit Committee and administratively to the CEO. The department has full and unrestricted access to all records, physical properties, and personnel within TASNEE and its affiliates, essential for performing its audits.

Beyond auditing, the department also conducts internal assessments as part of the Quality Assurance and Improvement Program in conformance with the International Standards for the Professional Practice of Internal Auditing set by the Institute of Internal Auditors (IIA). As part of the Quality Assurance and Improvement Program, and in line with IIA standards, the department underwent an independent External Quality Assessment conducted by the Saudi Institute of Internal Auditors. This assessment was conducted in alignment with the

International Professional Practices Framework (IPPF) standards. The Internal Audit department has achieved the rating of 'General Conformance', which is the highest level of conformance awarded by the Saudi Institute of Internal Auditors. This achievement underscores our commitment to excellence, professionalism, and adherence to the best globally recognized practices in internal auditing.

Throughout the year, all activities were carried out in accordance with the risk-based audit plan approved by the Audit Committee, focusing on high-risk areas to support our goals and protect our assets. The audit process evaluates the efficiency and effectiveness of internal controls. Results are shared with the relevant departments and SBUs to address findings, implement corrective actions, and ensure completion within agreed timeframes. Regular status reports highlight achievements, challenges, and the risks associated with unresolved observations and recommendations.

INTERNAL AUDITS PLANNED

RESPECTING HUMAN RIGHTS ACROSS OUR OPERATIONS

TASNEE is deeply committed to protecting, respecting, and promoting human rights across all aspects of our operations.

We adhere to international human rights standards, such as those outlined by the United Nations, and actively engage with experts, clients, and industry peers to identify and address any actual or potential human rights concerns within our value chain. Our commitment ensures that we comply with all relevant laws to protect and uphold human rights.

Our Code of Conduct explicitly incorporates human rights, setting clear expectations not only for our employees but also for our suppliers. We require our suppliers to uphold the highest standards by implementing robust operational procedures and mechanisms to safeguard human rights. Human rights are also embedded in our employment application documents, ensuring that every employee complies with these principles from their very first day with us.

HUMAN RIGHTS	UNITS	2022	2023	2024
Total number of hours in the reporting period devoted to training on human rights policies or procedures concerning aspects of human rights that are relevant to operations	Number	6,723	1,425	759

CUSTOMER EXPERIENCE & SATISFACTION

Customer satisfaction is fundamental to our business success. We have consistently worked to establish a strong reputation as a reliable and trustworthy service provider, earning the confidence of our clients.

While complaints are inevitable for a company of our size, we have a dedicated team of skilled customer service professionals who are trained to handle them efficiently. Each complaint is carefully tracked throughout the process, with a focus on addressing concerns and resolving issues at the earliest opportunity. We also analyze the root causes of complaints to ensure they do not recur. The feedback we receive help guide continuous improvements in our processes and systems, maintaining high standards.

Our customer service team is proactive, regularly conducting on-site visits to manage key accounts, offering support, and gathering additional feedback. In the event of a serious complaint, our structured governance and reporting system ensures that senior management is informed promptly, enabling them to take appropriate action.

In 2024, the number of customer complaints received by Downstream increased by 83 compared to the previous year’s complaints, representing a 27.7% rise. To address such complaints, several measures have been put in place, such as increasing daily quality checkpoints, extending aging time for specific stock-keeping units, and monitoring film production parameters more thoroughly to improve overall product quality and reduce complaints.

Notably, no substantiated complaints were received concerning breaches of customer privacy or data loss, continuing the trend of secure and reliable service with no reported incidents in these areas.

DOWNSTREAM - CUSTOMER SATISFACTION	UNITS	2022	2023	2024

Total number of identified leaks, thefts, or losses of customer data	Number	0	0	0

ADVANCING CYBERSECURITY

TASNEE Corporate Cybersecurity Capability Maturity Model Integration (CMMI) score stands at 3.7 out of 5. This score is higher than the global (2.7) and Saudi Arabia (3.4) averages. Following our approved cybersecurity strategy, we are working on achieving 4 out of 5 by 2027.

In 2024 we released a comprehensive set of cybersecurity policies for IT (Information Technology) and OT (Operational Technology). It covered all regulatory requirements in addition to what is required to support business initiatives such as Artificial Intelligence (AI).

We achieved several key milestones, including the successful segregation of TASNEE Petrochemical SBU network to enhance cybersecurity. Minimizing cyber risks from certain scenarios such as worm malware infection where it was possible to propagate quickly through the various nodes in the network. Additionally, we developed and integrated a comprehensive OT incident response preparation to ensure swift and effective action in the event of a cybersecurity incident by conducting continuous monitoring and availing internal and external incident response teams.

To further improve our cybersecurity management processes, we launched an Enterprise Governance, Risk, and Compliance (EGRC) system application.

This demonstrates our ongoing commitment to advancing our cybersecurity capabilities, aligning with industry best practices, and ensuring robust security measures across the organization.

DRIVING INNOVATION

Technology and Innovation at TASNEE is driven by our T&I Center in Jubail, which provides critical research and development, along with technical assistance to support product development and operations across the company.

The center focuses on four key areas: research and development, testing, training, and technical support. The labs are ISO/IEC 17025:2017-accredited by the International Accreditation Service (IAS), and the Saudi Accreditation Committee (SAC), with the accreditation renewed in 2023.

The T&I Center plays a central role in driving innovation and operational excellence at TASNEE. It leads to key initiatives in energy efficiency technologies, product development, process optimization, and manufacturing enhancements, all of which contribute to ESG and Sustainability and business growth. As one of the best-equipped research and development centers in petrochemical and plastic processing, the T&I division leverages cutting-edge technology and expertise to accelerate business development, ensuring we remain competitive and responsive to industry advancements, while delivering high-quality products and technical services.

T&I continuously focuses on product and process development to improve profitability and efficiency. This includes creating new injection molding grades, eliminating transition grades, and advancing high-tenacity fiber production. Additionally, we have achieved cost optimization through masterbatch and additive improvements for downstream products such as Agri-film and pipe solutions. These efforts support TASNEE local content strategy, fostering business continuity and customer-driven innovation. Additionally, strategic projects on sustainable product development, including gas storage materials and plastic chemical recycling, highlight our commitment to circular economy principles.

TASNEE recognizes the importance of technological advancements in achieving our strategic ESG objectives, including the goal of achieving net-zero carbon emissions by 2060. To ensure a thoughtful and effective approach, the company will adopt new technologies and make decisions guided by the following principles:

INNOVATION PRINCIPLES

CONTINUOUS MONITORING AND EVALUATION

TASNEE is committed to regularly assessing and refining our sustainability technology investments to ensure alignment with sustainability goals and business objectives while effectively managing risks.

BALANCED COST AND REGULATORY CONSIDERATIONS

Investment decisions will balance cost, regulatory requirements, and sustainability goals, ensuring compliance, optimizing returns, and minimizing environmental impact.

PROACTIVE MARKET APPROACH

TASNEE maintains a market-aware stance, taking a proactive but prudent approach to sustainability technological investments. The company aims to stay ahead of emerging trends and regulatory requirements whenever possible.

SUSTAINABLE SOLUTIONS

A sustainable approach to investing in sustainability technologies will be adopted, prioritizing cost-effective and innovative solutions that drive sustainability, business value, and long-term growth. TASNEE will seamlessly integrate innovative solutions into its operations to maximize efficiency and minimize disruption.

COLLABORATION AND PARTNERSHIPS

TASNEE will engage in strategic partnerships and collaborations to leverage expertise, share knowledge, and drive collective impact in the ESG technology space.

Accordingly, Decarbonization Roadmap will also be updated by the Technology and Innovation Department to support these initiatives.

TASNEE continued to advance its digital transformation in 2024, launching the TASNEENA internal portal and successfully implementing RPA Phase I for low-value PRs, with 55% of overall PRs now handled digitally. The company also achieved over 20 success stories on the ENJAZ platform, demonstrating its ongoing efforts to streamline processes and enhance operational efficiency through technology.

In 2024, we reached key milestones in digital transformation and process automation with the successful implementation of several advanced systems and projects. Major achievements included the rollout of Robotic Process Automation (Phase IV), the adoption of SAP S/4HANA Mobility, and the completion of ZATCA e-invoicing Phase-2. The company also introduced SAP-Vendor Invoice Management, SAC Planning for Corporate Functions, and rolled out TMIC (ETM) and ASIC SAP systems. Other notable initiatives included the Customer Follow-up Project, Treasury & Risk Management (SAP TRM), Cash & Liquidity Management (CM), and the deployment of SAP CX/CRM (Commerce Cloud and Sales and Services). Additionally, TASNEE integrated Signavio, SAP Fieldglass, SAP DMC-Digital Manufacturing Cloud, and SAP Cloud Identity Access Governance, while successfully migrating SAP PI-PO to CPI, driving innovation and enhancing operational efficiency across the organization.

PetChem promoted its digital transformation by developing a comprehensive five-year Digitalization Plan, identifying existing systems and assessing their readiness and integration. Digitalization is pivotal in unlocking value, fostering innovation, strengthening governance and compliance, and advancing sustainability. These efforts play a crucial role in supporting the growth of Saudi Arabia's digital economy and underscore PetChem's commitment to technological advancement.

CASE STUDY:

DRIVING INNOVATION THROUGH
SUSTAINABLE HR DIGITALIZATION

In 2024, TASNEE continued its commitment to innovation by advancing HR digital transformation, leveraging cutting-edge technologies like SuccessFactors and Robotic Process Automation (RPA). Over 30 HR processes were digitalized and automated, enhancing productivity, cost efficiency, and decision-making through improved data quality and analytical reporting. New systems for onboarding and offboarding were successfully implemented, alongside the rollout of ASIC employees, fostering agility and operational excellence. These advancements not only streamline HR operations but also enable a sharper focus on strategic priorities such as Learning and Development, Talent Management, and Organizational Effectiveness, positioning TASNEE as a leader in sustainable workplace innovation.

CASE STUDY:

OPERATIONAL EFFICIENCY
THROUGH SAP S/4HANA
WAVE-2 IMPLEMENTATION

In 2024, TASNEE enhanced its digital transformation with SAP S/4HANA Wave-2, improving efficiency, productivity, reporting, and cost optimization. This shift streamlines operations, reduces environmental impact through cloud-based solutions, and enables data-driven decision-making. These advancements enhance operational excellence while supporting sustainable business practices, reinforcing TASNEE's commitment to ESG and future growth.

RESPONSIBLE PROCUREMENT & SUPPLIER ASSESSMENT

At TASNEE, procurement plays a pivotal role in driving sustainability, innovation, and operational excellence. Our procurement policies and systems are designed to uphold the highest ESG standards, ensuring that our supply chain remains resilient, responsible, and aligned with Saudi Vision 2030.

We prioritize working with suppliers who share our values, integrating ESG principles, digital transformation, and responsible sourcing into our procurement framework. This ensures that every decision contributes to long-term sustainability, ethical business practices, and supply chain transparency.

Our procurement procedures undergo continuous benchmarking and improvement to align with evolving regulations, global ESG standards, and industry best practices. To ensure compliance, we have implemented a rigorous multi-stage supplier qualification process, which includes:

-  100% ESG screening for all new suppliers, assessing environmental and social impact.
-  Strict compliance with Business Ethics & General Procurement Policies, reinforcing ethical sourcing and responsible labor practices.
-  Strengthened supplier due diligence, conducted in collaboration with independent third parties.
-  Integration of digital solutions to enhance supplier performance tracking and risk assessment.

Through these measures, TASNEE ensures that all suppliers meet our stringent ESG requirements, contributing to a transparent, ethical, and sustainable supply chain.

In recognition of our outstanding procurement performance, TASNEE received four major global awards in 2024 including:

- **INNOVATION IN SUPPLY CHAINS AWARD**
Gulf Petrochemicals and Chemicals Association (GPCA) for the Digital Transformation Project.
- **BEST USE OF DIGITAL TECHNOLOGY AWARD**
Chartered Institute of Procurement & Supply (CIPS) for leveraging digital technology in procurement.
- **OUTSTANDING TALENT DEVELOPMENT PROGRAM AWARD**
CIPS for the ENJAZ project, focusing on knowledge management and talent development.
- **EXCELLENCE IN PROCUREMENT AWARD**
International Procurement and Supply Chain Awards (IPSC) 2024 (Blue Ocean) for outstanding procurement practices.

For the second consecutive year, we engaged a third party to conduct due diligence and pre-qualified suppliers based on social criteria, further reinforcing our commitment to sustainable and responsible procurement practices.

100% 

of our new suppliers were screened for environmental and social factors

SUPPORTING LOCAL SUPPLY CHAINS

TASNEE continues to support Saudi Vision 2030 through its procurement processes, prioritizing purchases from Saudi-based vendors to stimulate the local economy and foster the growth and development of local communities and the broader country.

In 2024, we engaged with 1,551 local suppliers, making up 78% of our total suppliers, similar to 77% in 2023. Our procurement spending on local suppliers reached SAR 3,935,927,769 in 2024, reflecting a consistent increase in our commitment to supporting the local supply chain.

The total number of engaged suppliers dropped to 2,560 in 2024 (from 3,341 in 2023). This decrease is primarily due to governance and compliance measures, where we regularly assess and adjust our supplier base based on evolving business needs, efficiency targets, and performance evaluations.

Additionally, 100% of our suppliers have signed our Code of Conduct, committing to adhere to our ethics and sustainability standards.

TASNEE continues to support Saudi Vision 2030 through its procurement processes, prioritizing purchases from Saudi-based vendors to stimulate the local economy and foster the growth and development of local communities and the broader country.

PROCUREMENT SPENDING

At TASNEE, our procurement strategy is not just about cost efficiency, it is a key enabler of sustainability, ESG compliance, and long-term business resilience. In 2024, we have expanded our procurement efforts to drive measurable impact and industry leadership in:

1. SCOPE 3 CARBON EMISSION REDUCTION

- Implementing supplier carbon reporting frameworks to quantify and reduce supply chain emissions.
- Prioritizing sourcing from low-carbon and environmentally certified suppliers, contributing to ESG-aligned procurement decisions.

2. LOCAL PROCUREMENT & ECONOMIC SUSTAINABILITY

- Increasing local supplier engagement to enhance supply chain resilience, reduce lead times, and create long-term economic value for the region.
- Strengthening supplier development programs to ensure compliance with sustainable sourcing policies.

3. ESG-DRIVEN SUPPLIER PERFORMANCE & COMPLIANCE

- Integrating ESG criteria into procurement evaluations, ensuring all strategic partners align with sustainability benchmarks.
- Conducting sustainability audits and launching supplier training programs to enhance awareness and adoption of responsible sourcing.

4. CARBON OFFSETTING & ENVIRONMENTAL IMPACT INITIATIVES

- Expanding our carbon offsetting portfolio through projects like the tree-planting initiative with Saudi Xerox, reinforcing our role in climate action.
- Partnering with suppliers that prioritize circular economy practices, promoting waste reduction and resource efficiency.

OUR COMMITMENT TO PROCUREMENT EXCELLENCE

Through these initiatives, TASNEE continues to lead in responsible procurement, ESG compliance, and supply chain sustainability. By embedding ESG principles into procurement decisions, we enhance corporate responsibility, reduce risks, and create long-term value for all stakeholders.

1. SUSTAINABLE SOURCING

We prioritize sourcing materials and products where possible from suppliers who adhere to our ESG standards, ensuring sustainable practices wherever possible. For instance, we produce recycled and biodegradable materials for our products and packaging, reducing waste and minimizing the demand for virgin resources.

CASE STUDY:

CAR BATTERY RECYCLING

We produce 1,040,396 million car batteries annually, with a closed-loop recycling system for scrap batteries. This program ensures responsible waste management and reduces the environmental impact of our operations.

2. DEFORESTATION-FREE SUPPLY CHAIN

We strive to eliminate deforestation from our supply chain by collaborating, where possible with suppliers who share our commitment to sustainability and biodiversity protection. For example, we have adopted renewable energy, such as solar power at our sites, and utilized 3D technology to print spare parts.

This innovative approach enables us to:

- Reduce inventory waste and obsolescence
- Minimize transportation emissions from shipping spare parts
- Decrease material usage and support a circular economy
- Enhance supply chain resilience and responsiveness

We also provide training, advice and support to suppliers to help them to adopt the principles of ESG.

CASE STUDY:

SUSTAINABLE PALLET INNOVATION

We manufacture over 1,165,804 million plastic pallets from recycled polymers, replacing traditional wooden pallets. This initiative reduces deforestation, promotes recycling, and supports a more circular economy.

3. REDUCING SCOPE 3 EMISSIONS AND SUPPORTING LOCAL COMMUNITIES

We work closely with our suppliers to minimize scope 3 emissions and promote local economic growth by purchasing products and services from local providers whenever possible. As a result, we are reducing our transportation emissions and working with service providers to achieve carbon offsetting. For example, in 2024 we worked with Saudi Xerox to plant over 2000 trees.

These initiatives demonstrate TASNEE's dedication to preserving biodiversity, reducing our environmental footprint, and promoting sustainable practices throughout our supply chain.

COMMUNITY IMPACT

GIVING BACK & CREATING CHANGE

As a leading regional company, we recognize our responsibility to positively impact the communities where we operate. We are committed to using our influence to drive social, environmental, and economic progress. One of the key methods we fulfill this responsibility is through our CSR initiatives which are designed to benefit a diverse range of individuals and communities.

MATERIAL ISSUES

-  Volunteering and Charities
-  Benefits to local Communities
-  Community Engagement

ALIGNMENT WITH SAUDI VISION 2030:

-  A Vibrant Society
-  A Thriving Economy

ALIGNMENT WITH UN SDGs:

CORPORATE SOCIAL RESPONSIBILITY

Our Social Responsibility Policy, aligned with Saudi Vision 2030 and our broader business objectives, outlines our social priorities and guides our partnerships with non-profit organizations to achieve our CSR goals.

Each potential partner undergoes a thorough vetting process to ensure their programs will deliver the intended impact. We conduct regular evaluations before, during, and after each program to accurately measure outcomes and assess the effectiveness of our initiatives, enabling continuous improvement.

In 2024, we significantly increased our community investment to SAR 5,317,329, more than doubling our spending from 2023. We also engaged 86 employee volunteers who contributed a total of 447 volunteer hours, underscoring our ongoing commitment to giving back to the community.

2024 COMMUNITY ENGAGEMENT AND INVESTMENT

As part of its efforts to establish a strong and lasting relationship with society and contribute its resources to serve the community, TASNEE continued its focus on corporate social responsibility in 2024 by providing sustainable social programs that address community needs.

This year, TASNEE's initiatives included a variety of programs such as providing sustainable food, winter clothing, orphan sponsorship, house renovation, and anti-smoking campaigns.

Continuing its achievements and ongoing pursuit of excellence, and as a result of its efforts in social responsibility, TASNEE achieved several milestones, including the implementation of 15 programs. The company had 86 employees volunteering, contributing a total of 447 volunteer hours, and over 13,000 individuals benefited from its initiatives throughout the year. TASNEE also received significant recognition and appreciation from officials and success partners during the year. Some of the highlights of the company's initiatives and the recognition it received are as follows:

- Awarded two gold awards in corporate social responsibility, including the Gold Category for Best Company Practices and the award for Best in the Business Services Sector, presented by the Ministry of Human Resources and Social Development in its first edition for 2024.
- Honored as part of the list of major donors of EHSAN platform for the third consecutive year, under the patronage of HRH Prince Mohammed bin Salman bin Abdulaziz, Crown Prince, and attended by HRH Prince Faisal bin Bandar bin Abdulaziz, Governor of Riyadh.

- Recognized by HRH Prince Saud bin Nayef bin Abdulaziz, Governor of the Eastern Region, for its support of several community programs in collaboration with success partners in the Eastern Region, including the Saudi Food Bank "Eta'am," Tarmeem Association, and the Orphans Care in the Eastern Province "Benaar".
- Recognized by His Excellency Bandar bin Ibrahim Al-Khorayef, Minister of Industry and Mineral Resources, for its contribution to the charitable campaign "Najood Bikhairna" for the third consecutive year, aiming to feed 5,000 beneficiary families during Ramadan in partnership with the Ministry of Industry and Mineral Resources and the "Made in Saudi" program.
- Continuous support from TASNEE and its employees for the Charitable Society for the Memorization of the Holy Qur'an in Jubail through a continuous monthly deduction program for over 10 years.
- Launched the second edition of the "Cooperate in Good" campaign during the Holy Month of Ramadan, offering employees the opportunity to donate and participate in various charitable programs, including orphan sponsorship, mosque care, home renovation, food support, and more."
- Strengthening partnership with the "Eta'am" Association, contributing to the sustainable food program (Takafol Eta'am), where TASNEE and its employees provided sustainable care to 110 beneficiary families throughout the year. TASNEE employees also participated in packing and distributing food baskets throughout the year.

- Strengthening cooperation with the Eastern Region Orphan Care Society "Benaar" to implement joint initiatives in social responsibility and achieve mutual goals in supporting orphans and contributing to their care, development, and empowerment.
- Launch of an anti-smoking awareness and treatment campaign in both Riyadh and Jubail in collaboration with the social responsibility success partner, the Naqaa Anti-Smoking Association, coinciding with World No Tobacco Day.
- Launch of the voluntary campaign "Our Giving Reaches Out" in Riyadh and Jubail coinciding with Saudi and International Volunteer Day, with distinguished participation from TASNEE employees. This included packing food baskets for distribution to beneficiary families in Riyadh and Jubail in collaboration with "Eta'am" and distributing winter clothing to 450 beneficiary families in Riyadh and Jubail in collaboration with "Kebair" and Wahaj associations.
- Organizing a tree-planting campaign which comprised of planting 1,800 trees as part of our efforts to contribute to the goals of the "Green Saudi" initiative, which aims to protect the environment and combat climate change.
- Participation in Environment Week events organized by the Ministry of Environment under the theme "Know Your Environment?" to raise environmental awareness and preserve natural resources through awareness messages, an environmental photography competition, and the launch of a series of events at various work sites.

APPENDIX B. GRI CONTENT INDEX

For the Content Index – Advanced Service, GRI Services reviewed that the GRI content index has been presented in a way consistent with the requirements for reporting in accordance with the GRI Standards, and that the information in the index is clearly presented and accessible to the stakeholders. The service was performed on the English version of the report.

STATEMENT OF USE	National Industrialization Company (TASNEE) has reported in accordance with the GRI Standards for the period from 1 January 2024 to 31 December 2024
GRI 1 USED	GRI 1: Foundation 2021
APPLICABLE GRI SECTOR STANDARD(S)	GRI 11: Oil and Gas Sector 2021

GRI STANDARD/ OTHER SOURCE	DISCLOSURE	LOCATION	OMISSION			GRI SECTOR STANDARD REF. NO.
			REQUIREMENT(S) OMITTED	REASON	EXPLANATION	
General disclosures						
GRI 2: General Disclosures 2021	2-1 Organizational details	8-16	A gray cell indicates that reasons for omission are not permitted for the disclosure or that a GRI Sector Standard reference number is not available.			
	2-2 Entities included in the organization's sustainability reporting	3, 11 - 13				
	2-3 Reporting period, frequency and contact point	3				
	2-4 Restatements of information	39, 41, 50, 61				
	2-5 External assurance	91				
	2-6 Activities, value chain and other business relationships	13				
	2-7 Employees	54, 55				
	2-8 Workers who are not employees	54, 46 - 47				
	2-9 Governance structure and composition	63 - 65				
	2-10 Nomination and selection of the highest governance body	65				

GRI 2: General Disclosures 2021	2-11 Chair of the highest governance body	63, 64			
	2-12 Role of the highest governance body in overseeing the management of impacts	64, 65, 68, 69			
	2-13 Delegation of responsibility for managing impacts	63 - 65			
	2-14 Role of the highest governance body in sustainability reporting	17 - 19			
	2-15 Conflicts of interest	67			
	2-16 Communication of critical concerns	26, 56, 67, 71			
	2-17 Collective knowledge of the highest governance body	Please refer to 2024 Annual Report pages 18 - 34			
	2-18 Evaluation of the performance of the highest governance body	69			
	2-19 Remuneration policies	65			
	2-20 Process to determine remuneration	65			
	2-21 Annual total compensation ratio	Not disclosed	Confidentiality constraints	Due to concerns about competitive sensitivity	
	2-22 Statement on sustainable development strategy	4, 5, 17 - 22			
	2-23 Policy commitments	4, 5, 29, 38, 42, 58, 64, 67, 68, 75, 79			
	2-24 Embedding policy commitments	4, 5, 29, 38, 42, 58, 64, 67, 68, 75, 79			
	2-25 Processes to remediate negative impacts	67			

GRI 2: General Disclosures 2021	2-26 Mechanisms for seeking advice and raising concerns	67					
	2-27 Compliance with laws and regulations	7, 17, 18, 24, 27, 42, 60, 67, 68, 72					
	2-28 Membership associations	16					
	2-29 Approach to stakeholder engagement	26					
	2-30 Collective bargaining agreements	Collective bargaining agreements are illegal in KSA.					
MATERIAL TOPICS							
GRI 3: Material Topics 2021	3-1 Process to determine material topics	27					
	3-2 List of material topics	27, 28, 43, 51, 60, 78					
ECONOMIC AND BUSINESS PERFORMANCE							
GRI 3: Material Topics 2021	3-3 Management of material topics	61, 62				11.14.1	
						11.2.1	
GRI 201: Economic Performance 2016	201-1 Direct economic value generated and distributed	61				11.14.2	
	201-2 Financial implications and other risks and opportunities due to climate change	29, 40				11.2.2	
	201-3 Defined benefit plan obligations and other retirement plans	Not disclosed				Confidentiality constraints	Due to sensitive business information
	201-4 Financial assistance received from government	The government did not provide any financial assistance					
GRI 203: Indirect Economic Impacts 2016	203-1 Infrastructure investments and services supported	Not disclosed	Information unavailable/incomplete	Limited access to data	11.14.4		
	203-2 Significant indirect economic impacts	Not disclosed	Information unavailable/incomplete	Limited access to data	11.14.5		
DIVERSITY							
GRI 3: Material Topics 2021	3-3 Management of material topics	58				11.11.1	
						11.14.1	

GRI 202: Market Presence 2016	202-1 Ratios of standard entry level wage by gender compared to local minimum wage	Not disclosed	Information unavailable/incomplete	We do not conduct the necessary assessments but may plan to do so in the future	
	202-2 Proportion of senior management hired from the local community	59			11.11.2 11.14.3
GRI 405: Diversity and Equal Opportunity 2016	405-1 Diversity of governance bodies and employees	53, 58			11.11.5
	405-2 Ratio of basic salary and remuneration of women to men	Not disclosed	Confidentiality constraints	We keep this information confidential due to competitiveness, but it may be disclosed in the future	11.11.6
BUSINESS ETHICS					
GRI 3: Material Topics 2021	3-3 Management of material topics	66 - 70			11.20.1
GRI 205: Anti-corruption 2016	205-1 Operations assessed for risks related to corruption	67			11.20.2
	205-2 Communication and training about anti-corruption policies and procedures	67			11.20.3
	205-3 Confirmed incidents of corruption and actions taken	67			11.20.4
ENERGY MANAGEMENT					
GRI 3: Material Topics 2021	3-3 Management of material topics	33 - 34			11.1.1
GRI 302: Energy 2016	302-1 Energy consumption within the organization	33			11.1.2
	302-2 Energy consumption outside of the organization	Not disclosed	Information unavailable/incomplete	We have not yet measured this because we have not established the necessary data collection mechanisms but plan to in the future	11.1.3
	302-3 Energy intensity	33			11.1.4
	302-4 Reduction of energy consumption	33			
	302-5 Reductions in energy requirements of products and services	33			

WATER USE					
GRI 3: Material Topics 2021	3-3 Management of material topics	40, 41			11.6.1
GRI 303: Water and Effluents 2018	303-1 Interactions with water as a shared resource	40			11.6.2
	303-2 Management of water discharge-related impacts	40			11.6.3
	303-3 Water withdrawal	41			11.6.4
	303-4 Water discharge	41			11.6.5
	303-5 Water consumption	41			11.6.6
GREENHOUSE GAS EMISSIONS					
GRI 3: Material Topics 2021	3-3 Management of material topics	29 - 32			11.1.1
GRI 305: Emissions 2016	305-1 Direct (Scope 1) GHG emissions	31			11.1.5
	305-2 Energy indirect (Scope 2) GHG emissions	31			11.1.6
	305-3 Other indirect (Scope 3) GHG emissions	Not disclosed	Information unavailable/ incomplete	We are considering establishing a data collection mechanism and providing emissions data in the future	11.1.7
	305-4 GHG emissions intensity	31			11.1.8
	305-5 Reduction of GHG emissions	31			11.2.3
	305-6 Emissions of ozone-depleting substances (ODS)	TASNEE follows and complies with the ODS phase-out plan in accordance with the Montreal Protocol			
	305-7 Nitrogen oxides (NOx), sulfur oxides (SOx), and other significant air emissions	32			11.3.2
HAZARDOUS SUBSTANCES					
GRI 3: Material Topics 2021	3-3 Management of material topics	38 - 39			11.8.1
GRI 306: Effluents and Waste 2016	306-3 Significant spills	38			11.8.2

EFFLUENT AND POLLUTANTS				
GRI 3: Material Topics 2021	3-3 Management of material topics	35 - 37		11.5.1
GRI 306: Waste 2020	306-1 Waste generation and significant waste-related impacts	36		11.5.2
	306-2 Management of significant waste-related impacts	35 - 36		11.5.3
	306-3 Waste generated	36		11.5.4
	306-4 Waste diverted from disposal	36		11.5.5
	306-5 Waste directed to disposal	36		11.5.6
PROCUREMENT AND SUPPLIER ASSESSMENT				
GRI 3: Material Topics 2021	3-3 Management of material topics	75 - 77		11.14.1
				11.10.1
GRI 204: Procurement Practices 2016	204-1 Proportion of spending on local suppliers	76		11.14.6
GRI 308: Supplier Environmental Assessment 2016	308-1 New suppliers that were screened using environmental criteria	75		
	308-2 Negative environmental impacts in the supply chain and actions taken	75 -77, 90		
GRI 414: Supplier Social Assessment 2016	414-1 New suppliers that were screened using social criteria	75		11.10.8
	414-2 Negative social impacts in the supply chain and actions taken	75 - 77		11.10.9
RECRUITMENT AND RETENTION				
GRI 3: Material Topics 2021	3-3 Management of material topics	54, 55		11.10.1
				11.11.1
GRI 401: Employment 2016	401-1 New employee hires and employee turnover	55		11.10.2
	401-2 Benefits provided to full-time employees that are not provided to temporary or part-time employees	57		11.10.3
	401-3 Parental leave	57		11.10.4
				11.11.3

ENGAGEMENT AND SATISFACTION					
GRI 3: Material Topics 2021	3-3 Management of material topics	56			11.10.1
GRI 402: Labor/Management Relations 2016	402-1 Minimum notice periods regarding operational changes	Not disclosed	Confidentiality constraints	Due to concerns about sensitive business decisions that could impact workforce stability or competitive positioning	11.10.5
OCCUPATIONAL HEALTH AND SAFETY					
GRI 3: Material Topics 2021	3-3 Management of material topics	45 - 50			11.9.1
GRI 403: Occupational Health and Safety 2018	403-1 Occupational health and safety management system	45			11.9.2
	403-2 Hazard identification, risk assessment, and incident investigation	48, 50			11.9.3
	403-3 Occupational health services	45			11.9.4
	403-4 Worker participation, consultation, and communication on occupational health and safety	45			11.9.5
	403-5 Worker training on occupational health and safety	47			11.9.6
	403-6 Promotion of worker health	45			11.9.7
	403-7 Prevention and mitigation of occupational health and safety impacts directly linked by business relationships	50			11.9.8
	403-8 Workers covered by an occupational health and safety management system	45			11.9.9
	403-9 Work-related injuries	46			11.9.10
	403-10 Work-related ill health	46			11.9.11
DEVELOPMENT AND TRAINING					
GRI 3: Material Topics 2021	3-3 Management of material topics	52, 53			11.10.1
					11.11.1

GRI 404: Training and Education 2016	404-1 Average hours of training per year per employee	53		11.10.6
				11.11.4
	404-2 Programs for upgrading employee skills and transition assistance programs	52, 53		11.10.7
	404-3 Percentage of employees receiving regular performance and career development reviews	53		
INCLUSION AND EQUALITY				
GRI 3: Material Topics 2021	3-3 Management of material topics	58		11.11.1
GRI 406: Non-discrimination 2016	406-1 Incidents of discrimination and corrective actions taken	58, 64		11.11.7
COMMUNITY ENGAGEMENT				
GRI 3: Material Topics 2021	3-3 Management of material topics	79 - 80		11.15.1
GRI 413: Local Communities 2016	413-1 Operations with local community engagement, impact assessments, and development programs	80		11.15.2
	413-2 Operations with significant actual and potential negative impacts on local communities	20, 21, 26, 38, 77		11.15.3
PRODUCT STEWARDSHIP				
GRI 3: Material Topics 2021	3-3 Management of material topics	42		11.3.1
GRI 416: Customer Health and Safety 2016	416-1 Assessment of the health and safety impacts of product and service categories	42		11.3.3
	416-2 Incidents of non-compliance concerning the health and safety impacts of products and services	21, 26, 76, 77		
CUSTOMER FEEDBACK AND SATISFACTION				
GRI 3: Material Topics 2021	3-3 Management of material topics	71		
GRI 418: Customer Privacy 2016	418-1 Substantiated complaints concerning breaches of customer privacy and losses of customer data	71		

TOPICS THAT ARE NOT COVERED BY THE GRI TOPIC STANDARDS		
CLIMATE CHANGE (POLICY AND STRATEGY)		
GRI 3: Material Topics 2021	3-3 Management of material topics	29
LEGAL COMPLIANCE		
GRI 3: Material Topics 2021	3-3 Management of material topics	67
BENEFITS TO LOCAL COMMUNITIES		
GRI 3: Material Topics 2021	3-3 Management of material topics	79
VOLUNTEERING AND CHARITIES		
GRI 3: Material Topics 2021	3-3 Management of material topics	79, 80
HUMAN RIGHTS		
GRI 3: Material Topics 2021	3-3 Management of material topics	70
INNOVATION		
GRI 3: Material Topics 2021	3-3 Management of material topics	73
TOPICS IN THE APPLICABLE GRI SECTOR STANDARDS DETERMINED AS NOT MATERIAL		
Topic	Explanation	
Topic 11.4 Biodiversity	Biodiversity impacts relatively minimal in its operations, where activities are primarily confined to industrial sites and do not significantly affect diverse ecosystems. However, TASNEE is making significant efforts through the implementation of effective biodiversity initiatives. For more details, refer to page 30 and page 77 .	
Topic 11.7 Closure and rehabilitation	Our operations involve continuous production facilities with minimal environmental disruption and no current or planned activities that would require significant closure or rehabilitation efforts.	
Topic 11.12 Forced labor and modern slavery	We have rigorous policies and supplier due diligence processes in place to prevent forced labor and modern slavery within our supply chain, with no identified risks or incidents that would materially impact operations.	
Topic 11.13 Freedom of association and collective bargaining	Legal constraints within Saudi Arabia restrict the scope of labor union activities and collective bargaining, minimizing significant impacts on our operations.	
Topic 11.16 Land and resource rights	Operations primarily involve leased or privately owned land with no disputes or significant conflicts over resource rights. Our activities do not foresee expansion into areas where land rights issues would be a concern.	

Topic 11.17 Rights of indigenous peoples	Operations in Saudi Arabia's oil and gas sector do not impact indigenous communities or their rights. Projects are situated in areas without indigenous populations.
Topic 11.18 Conflict and security	We operate within secure industrial zones and adhere to rigorous security protocols in our oil and gas operations. We implement proactive measures and mitigate risks related to conflict and security incidents.
Topic 11.19 Anti-competitive behavior	We maintain strict adherence to anti-competitive practices and compliance with regulatory frameworks within Saudi Arabia's oil and gas sector. There are no identified instances or significant risks of anti-competitive behavior that would necessitate detailed reporting.
Topic 11.21 Payments to governments	We follow standard industry practices regulated by local authorities and ensure compliance with all financial obligations, with no material discrepancies or significant impacts.
Topic 11.22 Public policy	Not material to our company's engagement with public policy issues, which is primarily focused on regulatory compliance and alignment with national industry standards.

APPENDIX C. OUR CORPORATE ESG AND SUSTAINABILITY STRATEGY GOALS

#	GOALS AND COMMITMENT	ALIGNMENT WITH ESG AND SUSTAINABILITY STRATEGY			OWNER	TIMELINE
		STRATEGIC PRIORITY	KEY PILLAR	UN-SDGs		
1	Reduce GHG Emission intensity by 15% from the SBU baseline	Environment	Environment Stewardship	12, 13	SBUs	2030
2	Decrease Energy Intensity by 15% from the SBU baseline	Environment	Environment Stewardship	12, 13		2030
3	Reduce Waste by 30% from the SBU baseline	Environment	Environment Stewardship	12, 13		2029
4	Reduce Water Intensity by 20% from the SBU baseline	Environment	Environment Stewardship	12, 13		2030
5	a) Increase Renewable Energy use in the Technology and Innovation BU by 20% b) Introduce renewable energy at the Metallurgy SBU	Environment	Environment Stewardship	12, 13		2028
6	Maintain zero chemical spills across all operations and facilities	Environment	Environment Stewardship	12, 13		2030
7	Accelerate the plantation of trees by 50% from the 2023 baseline of 3,000 to offset carbon emissions and support reforestation efforts	Environment	Environment Stewardship	12, 13		2028
8	T&I to comply 100% with regulatory changes affecting TASNEE through its Product Stewardship Program	Environment	Environment Stewardship	12, 13		2030
9	Obtain approval of a Decarbonization Road Map 2025–2030	Environment	Environment Stewardship	12, 13		2025

Note: The baseline figures and their timelines vary between each SBU. The above goals are subject to change based on any future need or legislative requirements.

#	GOALS AND COMMITMENT	CURRENT BASELINE	ALIGNMENT WITH ESG AND SUSTAINABILITY STRATEGY			OWNER JOINT	TIMELINE
			STRATEGIC PRIORITY	KEY PILLAR	UN-SDGs		
1	Improve Employee Engagement Score by 5%	70%	Social	Human Capital Development	3, 8	Corporate Functions / BU's	2029
2	Sustain below 10% voluntary employee turnover	9.50%	Social	Human Capital Development	3, 5, 8		2029
3	Increase direct hire female participants in the workforce by 10%* from the total workforce	139	Social	Human Capital Development	3, 5, 8		2030
4	Fill 50% of our managerial positions from within	50%	Social	Human Capital Development	3, 8		2028
5	Increase the contribution on Community Initiatives by 15% and ascertain ROI from such investment	SR 2.44M	Social	Community Impact	3, 4, 8		2030
6	Increase employee training hours by 35%	104,173 hours	Social	Human Capital Development	3, 4, 8		2030
7	Maintain Zero Human Rights Incidents	0	Social	Human Capital Development	3, 4, 8		2030
8	Obtain at least 1 external recognition as an employer of choice	-	Social	Human Capital Development	3, 8		2027
9	Boost staff engagement in ESG-related volunteering programs by 30%	465 hours	Social	Community Impact	3, 8		2029
10	Maintain zero work-related fatalities across all operations and activities	0	Social	Health and Safety	3, 8		2030
11	Achieve a 20% increase in Health Screening	1,228	Social	Health and Safety	3, 8		2028

Note: The current baseline is based on 2023 figures.

*Based on regular direct hired employees excluding contractors, trainees, and YDPs in 2023. The above goals are subject to change based on any future need or legislative requirements.

#	GOALS AND COMMITMENT	CURRENT BASELINE	ALIGNMENT WITH ESG AND SUSTAINABILITY STRATEGY			OWNER	TIMELINE
			STRATEGIC PRIORITY	KEY PILLAR	UN-SDGs		
1	Ensure that all employees receive training each year on anti-corruption, code of conduct, and conflict of interest	82%	Governance	Responsible Business	9, 12, 16	Corporate Functions / BU's	2030
2	Increase the cybersecurity maturity level (CMMI) at corporate to 4/5 by 2027	3.7/5	Governance	Responsible Business	9, 12, 16		2027
3	Ensure all new suppliers are screened using ESG criteria	100%	Governance	Responsible Business	9, 12, 16		2028
4	Finalise a Board Diversity Policy	n/a	Governance	Responsible Business	9, 12, 16		2027
5	Ensure 100% compliance to the Saudi Personal Data Protection Law	n/a	Governance	Responsible Business	9, 12, 16		2028

7	The Company should comply with all regulatory requirements	100%	Governance	Responsible Business	9, 12, 16		2026
8	Establish Board Performance measures and KPIs	n/a	Governance	Responsible Business	9, 12, 16		2025

Note: The current baseline is based on 2023 figures. The above goals are subject to change based on any future need or legislative requirements.

APPENDIX D. INDEPENDENT ASSURANCE

INDEPENDENT ASSURANCE STATEMENT

TO: NATIONAL INDUSTRIALIZATION COMPANY (TASNEE)

INTRODUCTION AND OBJECTIVES OF THE WORK:

National Industrialization Company, TASNEE (Company) has engaged Bureau Veritas Certification to provide limited assurance on the following subject matter information ("Subject Matter"). Our objective is to determine whether, based on the procedures performed, anything has come to our attention that would cause us to believe that the Subject Matter has not been prepared, in all material aspects, in accordance with the applicable criteria ("Applicable Criteria") as specified below.

SUBJECT MATTER

The subject matter for our limited assurance engagement included the selected quantitative indicators outlined below:

- Water Management
- Green House Gas (GHG) Accounting
- Waste Management

As presented in the Company's 2024 Sustainability Report for the year ended 31 December 2024, which was prepared and presented by the Company's management. The above quantitative indicators are based on the reporting boundary established by the Company, encompassing operating facilities in the Kingdom of Saudi Arabia across all three main Strategic Business Units (Petrochemicals, Downstream, and Metallurgy) alongside its Business Units. Unless explicitly stated, data related to external contractors, suppliers, and customers are not included.

APPLICABLE CRITERIA

The criteria for this limited assurance engagement were the reporting requirements of the Global Reporting Initiative (GRI) standards issued by the Global Sustainability Standards Board (GSSB). The applicable criteria for each selected indicator can be found in Annexure 1 of this report.

ASSESSMENT STANDARD

The assurance process was conducted in line with the requirements of the International Standard on Assurance Engagements- ISAE 3000 Revised, Assurance Engagements Other than Audits or Reviews of Historical Financial Information and International Standard on Assurance Engagements- ISAE 3410, Assurance Engagements on Greenhouse Gas Statements.

LIMITATIONS AND EXCLUSIONS

Our assurance was primarily based on Company-provided documentation and interactions with relevant personnel. Our engagement, conducted on a test basis; additionally, our procedures did not encompass testing the completeness of outputs from the Company's data collecting systems, used for the compilation of the Subject Matter information. The Subject Matter may contain errors or irregularities that remain undetected due to limitations.

Additionally, for the purpose of this limited assurance engagement, we have not performed any procedures involving:

- Verifying any assertions or qualitative information within the ESG report beyond the quantitative data relating to the specified indicators mentioned in the subject matter.
- Evaluating the accuracy and completeness of the reporting boundaries defined by the management for the purpose of the ESG report.
- Reviewing the method utilized by management to conduct materiality assessment.
- Company position statements (including any expression of opinion, belief, aspiration, expectation, aim or future intent).
- Historic text which was unchanged from previous years and did not relate to ongoing activities.
- Financial data.
- Appropriateness of commitments and objectives chosen by the company.

RESPONSIBILITIES

The preparation and presentation of the Subject Matter in accordance with the Applicable Criteria are the sole responsibility of the Management of TASNEE.

Bureau Veritas Certification was not involved in drafting of the Subject Matter. Bureau Verita's responsibilities included:

- Providing limited assurance as per ISAE 3000 and ISAE 3410' over the accuracy, reliability and objectivity of the information contained within the Subject Matter.
- Forming an independent conclusion based on the assurance procedures performed and evidence obtained.

METHODOLOGY

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

As part of our independent assurance, our work included:

1. Conducting employee interviews regarding the scope of work involved.
2. Process analysis of collecting and reporting the information/data included.
3. Verifying the completeness of the quantitative data included in the subject matter to ensure it encompasses all sites/operating units within the reporting boundary established by the Company.
4. Review of documentary evidence produced by the Company including the third-party documents and regulatory reports provided.
5. Recalculation of examples in accordance with the evidence documents used to prepare the information included.
6. Implementation of analytical procedures on the final reported data.

LIMITED ASSURANCE CONCLUSION

This assurance report has been prepared for National Industrialization Company (TASNEE) to provide limited assurance on the Subject Matter Information in the Company's 2024 Sustainability Report for the year ended December 31, 2024.

Based on the procedures performed and evidence obtained, nothing has come to our attention that causes us to believe that the Subject Matter Information in the Company's 2024 Sustainability Report for the year ended 31 December 2024 has not been prepared in all material respects in accordance with the Applicable Criteria.

STATEMENT OF INDEPENDENCE, COMPETENCE AND QUALITY CONTROL

Bureau Veritas is an independent professional services company that specialises in quality, environmental, health, safety and social accountability with over 190 years history. Its assurance team has extensive experience in conducting verification over environmental, social, ethical and health and safety information, systems and processes.

Bureau Veritas maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards, quality reviews and applicable legal and regulatory requirements which we consider to be equivalent to ISQM 1 & 2: International Standard on Quality Management 1 (Previously International Standard on Quality Control 1) & International Standard on Quality Management 2.

Bureau Veritas has implemented and applied a Code of Ethics across the business to ensure that its employees maintain integrity, objectivity, professional competence and due care, confidentiality, professional behaviour and high ethical standards in their day-to-day business activities. We consider this to be equivalent to the requirements of the I ESBA Code: Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants.

No member of the assurance team has a business relationship with National Industrialization Company (TASNEE), its directors or Managers beyond that required of this assignment. We have conducted this verification independently, and there has been no conflict of interest.
